Connect SDKs represent a set of comprehensive tools that provide native bindings on top of the REST API into various programming environments:

While it's always possible to address integration by using REST API, it is much easier to use one of our SDKs rather than implementing various routine tasks via API. The majority of provided Connect Extensions are built by using one of our SDKs.

	JavaScript (Node.js) SDK
	PHP SDK
	OpenAPI Client and **Python SDK**
	Command Line Interface

It is also recommended to visit **CloudBlue GitHub** page (**https://github.com/cloudblue**) and get familiar with our open-source tools. These tools can make your work with the CloudBlue Connect® platform easier and much more efficient.
