Classes

ProductActionResource

The *ProductActionResource* class provides methods to access the *Action* objects for a product.

ProductVersionResource \Leftarrow GenericResource

The *ProductVersionResource* class provides methods to access the *Version* objects for a product.

ProductConfigurationResource \Leftarrow GenericResource

The *ProductConfigurationResource* class provides methods to access the *ProductConfiguration* objects for a product.

ProductParameterResource \Leftarrow GenericResource

The *ProductParameterResource* class provides methods to access the *Productparameter* objects for a product.

ProductConnectionsResource \Leftarrow GenericResource

The *ProductConnectionsResource* class provides methods to access the *ProductConnection* objects for a product.

ProductUsageRuleResource \Leftarrow GenericResource

The *ProductUsageRulesResource* class provides methods to access the *ProductUsageRule* objects for a product.

ProductResource \Leftarrow GenericResource

The *ProductResource* class provides methods to access the products endpoint of the Cloud Blue Connect API.

ProductActionResource

The *ProductActionResource* class provides methods to access the *Action* objects for a product.

Kind: global class
Category: Resources

productActionResource.link(id, assetId) ⇒ object

Returns the *ActionLink* object for a product and asset.

Kind: instance method of ProductActionResource
Returns: object – The *ActionLink* object.

Param	Type	Description
id	string	The unique identifier of the <i>Action</i> .
assetId	string	The unique identifier of the <i>Asset</i> .

ProductVersionResource ⇐ GenericResource

The *ProductVersionResource* class provides methods to access the *Version* objects for a product.

Kind: global class
Extends: GenericResource
Category: Resources

- ProductVersionResource ⇐ GenericResource
 - new ProductVersionResource(client, baseUri)
 - .actions(id) ⇒ ProductActionResource

new ProductVersionResource(client, baseUri)

Creates a new instance of the *ProductVersionResource* class.

Returns: ProductVersionResource – An instance of the *ProductVersionResource* class.

Param	Type	Description
client	ConnectClient	An instance of the <i>ConnectClient</i> class.
baseUri	string	The base uri for this resource.

productVersionResource.actions(id) ⇒ ProductActionResource

Returns an instance of the *ProductActionResource* class to access the *Action* objects configured for a specific version of a *Product*.

Kind: instance method of ProductVersionResource
Returns: ProductActionResource – The instance of the *ProductActionResource* class for a product/version.

Param	Type	Description
id	string	The unique identifier of the <i>Version</i> object for a <i>Product</i> .

ProductConfigurationResource ⇐ GenericResource

The *ProductConfigurationResource* class provides methods to access the *ProductConfiguration* objects for a product.

Kind: global class
Extends: GenericResource
Category: Resources

ProductParameterResource ⇐ GenericResource

The *ProductParameterResource* class provides methods to access the *Productpameter* objects for a product.

Kind: global class
Extends: GenericResource
Category: Resources

ProductConnectionsResource ⇐ GenericResource

The *ProductConnectionsResource* class provides methods to access the *ProductConnection* objects for a product.

Kind: global class
Extends: GenericResource
Category: Resources

ProductUsageRuleResource ← GenericResource

The *ProductUsageRulesResource* class provides methods to access the *ProductUsageRule* objects for a product.

Kind: global class
Extends: GenericResource
Category: Resources

ProductResource ← GenericResource

The *ProductResource* class provides methods to access the products endpoint of the Cloud Blue Connect API.

Kind: global class
Extends: GenericResource
Category: Resources

- ProductResource ← GenericResource
 - new ProductResource(client)
 - .actions(id) ⇒ ProductActionResource
 - .versions(id) ⇒ ProductVersionResource
 - .configurations(id) ⇒ ProductConfigurationResource
 - .parameters(id) ⇒ ProductParameterResource
 - .connections(id) ⇒ ProductConnectionsResource
 - .usageRules(id) ⇒ ProductUsageRuleResource
 - .getTemplates(id) ⇒ Array
 - .getParameters(id) ⇒ Array
 - .getItems(id) ⇒ Array
 - .getConnections(id) ⇒ Array

new ProductResource(client)

Creates a new instance of the *ProductResource* class.

Returns: ProductResource – An instance of the *ProductResource* class.

Param	Type	Description
client	ConnectClient	An instance of the <i>ConnectClient</i> class.

productResource.actions(id) ⇒ ProductActionResource

Returns an instance of the *ProductActionResource* for a *Product*.

Kind: instance method of ProductResource
Returns: ProductActionResource – An instance of the *ProductActionResource* for the product.

Param	Type	Description
id	string	The unique identifier of the <i>Product</i> .

productResource.versions(id) ⇒ ProductVersionResource

Returns an instance of the *ProductVersionResource* for a *Product*.

Kind: instance method of ProductResource
Returns: ProductVersionResource – An instance of the *ProductVersionResource* for the product.

Param	Type	Description
id	string	The unique identifier of the <i>Product</i> .

productResource.configurations(id) ⇒ ProductConfigurationResource

Returns an instance of the *ProductConfigurationResource* for a *ProductConfiguration*.

Kind: instance method of ProductResource
Returns: ProductConfigurationResource – An instance of the *ProductConfigurationResource* for the product.

Param	Type	Description
id	string	The unique identifier of the <i>Product</i> .

productResource.parameters(id) ⇒ ProductParameterResource

Returns an instance of the *ProductParameterResource* for a *Product*.

Kind: instance method of ProductResource

Returns: ProductParameterResource – An instance of the *ProductParameterResource* for the product.

Param	Type	Description
id	string	The unique identifier of the <i>Product</i> .

productResource.connections(id) ⇒ ProductConnectionsResource

Returns an instance of the *ProductConnectionsResource* for a *Product*.

Kind: instance method of ProductResource
Returns: ProductConnectionsResource – An instance of the *ProductParameterResource* for the product.

Param	Type	Description
id	string	The unique identifier of the <i>Product</i> .

productResource.usageRules(id) ⇒ ProductUsageRuleResource

Returns an instance of the *ProductUsageRulesResource* for a *Product*.

Kind: instance method of ProductResource
Returns: ProductUsageRuleResource – An instance of the *ProductUsageRuleResource* for the product.

Param	Type	Description
id	string	The unique identifier of the <i>Product</i> .

productResource.getTemplates(id) ⇒ Array

Returns the list of *Template* objects configured for the *Product*.

Kind: instance method of ProductResource
Returns: Array – The list of *Template* objects.

Param	Type	Description
id	string	The unique identifier of the <i>Product</i> .

productResource.getParameters(id) ⇒ Array

Deprecated

Returns the list of *Parameter* objects configured for the *Product*.

Kind: instance method of ProductResource
Returns: Array - The list of *Parameter* objects.

Param	Type	Description
id	string	The unique identifier of the <i>Product</i> .

productResource.getItems(id) ⇒ Array

Returns the list of *ProductItem* objects configured for the *Product*.

Kind: instance method of ProductResource
Returns: Array - The list of *ProductItem* objects.

Param	Type	Description
id	string	The unique identifier of the <i>Product</i> .

productResource.getConnections(id) ⇒ Array

Returns the list of *Connection* objects configured for the *Product*.

Kind: instance method of ProductResource
Returns: Array - The list of *Connection* objects.

Param	Type	Description
id	string	The unique identifier of the <i>Product</i> .
