Classes

ProductActionResource

The *ProductActionResource* class provides methods to access the *Action* objects for a product.

ProductVersionResource ⇐ `GenericResource`

The *ProductVersionResource* class provides methods to access the *Version* objects for a product.

ProductConfigurationResource ⇐ `GenericResource`

The *ProductConfigurationResource* class provides methods to access the *ProductConfiguration* objects for a product.

ProductParameterResource ⇐ `GenericResource`

The *ProductParameterResource* class provides methods to access the *Productpameter* objects for a product.

ProductConnectionsResource ⇐ `GenericResource`

The *ProductConnectionsResource* class provides methods to access the *ProductConnection* objects for a product.

ProductUsageRuleResource ⇐ `GenericResource`

The *ProductUsageRulesResource* class provides methods to access the *ProductUsageRule* objects for a product.

ProductResource ⇐ `GenericResource`

The *ProductResource* class provides methods to access the products endpoint of the Cloud Blue Connect API.

ProductActionResource

The *ProductActionResource* class provides methods to access the *Action* objects for a product.

© Ingram Micro, Inc. All Rights Reserved.

Kind: global class
Category: Resources

productActionResource.link(id, assetId) ⇒ `object`

Returns the *ActionLink* object for a product and asset.

Kind: instance method of `ProductActionResource`
Returns: `object` – The *ActionLink* object.

Param	Type	Description
id	`string`	The unique identifier of the *Action*.
assetId	`string`	The unique identifier of the *Asset*.

ProductVersionResource ⇐ `GenericResource`

The *ProductVersionResource* class provides methods to access the *Version* objects for a product.

Kind: global class
Extends: `GenericResource`
Category: Resources

- ProductVersionResource ⇐ `GenericResource`
  - new ProductVersionResource(client, baseUri)
  - .actions(id) ⇒ `ProductActionResource`

new ProductVersionResource(client, baseUri)

Creates a new instance of the *ProductVersionResource* class.

Returns: `ProductVersionResource` – An instance of the *ProductVersionResource* class.

Param	Type	Description
client	`ConnectClient`	An instance of the *ConnectClient* class.
baseUri	`string`	The base uri for this resource.

© Ingram Micro, Inc. All Rights Reserved.

productVersionResource.actions(id) ⇒ `ProductActionResource`

Returns an instance of the *ProductActionResource* class to access the *Action* objects configured for a specific version of a *Product*.

Kind: instance method of `ProductVersionResource`
Returns: `ProductActionResource` – The instance of the *ProductActionResource* class for a product/version.

Param	Type	Description
id	`string`	The unique identifier of the *Version* object for a *Product*.

ProductConfigurationResource ⇐ `GenericResource`

The *ProductConfigurationResource* class provides methods to access the *ProductConfiguration* objects for a product.

Kind: global class
Extends: `GenericResource`
Category: Resources

ProductParameterResource ⇐ `GenericResource`

The *ProductParameterResource* class provides methods to access the *Productpameter* objects for a product.

Kind: global class
Extends: `GenericResource`
Category: Resources

ProductConnectionsResource ⇐ `GenericResource`

The *ProductConnectionsResource* class provides methods to access the *ProductConnection* objects for a product.

Kind: global class
Extends: `GenericResource`
Category: Resources

© Ingram Micro, Inc. All Rights Reserved.

ProductUsageRuleResource ⇐ `GenericResource`

The *ProductUsageRulesResource* class provides methods to access the *ProductUsageRule* objects for a product.

Kind: global class
Extends: `GenericResource`
Category: Resources

ProductResource ⇐ `GenericResource`

The *ProductResource* class provides methods to access the products endpoint of the Cloud Blue Connect API.

Kind: global class
Extends: `GenericResource`
Category: Resources

- ProductResource ⇐ `GenericResource`
  - new ProductResource(client)
  - .actions(id) ⇒ `ProductActionResource`
  - .versions(id) ⇒ `ProductVersionResource`
  - .configurations(id) ⇒ `ProductConfigurationResource`
  - .parameters(id) ⇒ `ProductParameterResource`
  - .connections(id) ⇒ `ProductConnectionsResource`
  - .usageRules(id) ⇒ `ProductUsageRuleResource`
  - .getTemplates(id) ⇒ `Array`
  - .getParameters(id) ~~⇒ `Array`~~
  - .getItems(id) ⇒ `Array`
  - .getConnections(id) ⇒ `Array`

new ProductResource(client)

Creates a new instance of the *ProductResource* class.

Returns: `ProductResource` – An instance of the *ProductResource* class.

Param	Type	Description
client	`ConnectClient`	An instance of the *ConnectClient* class.

© Ingram Micro, Inc. All Rights Reserved.

productResource.actions(id) ⇒ `ProductActionResource`

Returns an instance of the *ProductActionResource* for a *Product*.

Kind: instance method of `ProductResource`
Returns: `ProductActionResource` – An instance of the *ProductActionResource* for the product.

Param	Type	Description
id	`string`	The unique identifier of the *Product*.

productResource.versions(id) ⇒ `ProductVersionResource`

Returns an instance of the *ProductVersionResource* for a *Product*.

Kind: instance method of `ProductResource`
Returns: `ProductVersionResource` – An instance of the *ProductVersionResource* for the product.

Param	Type	Description
id	`string`	The unique identifier of the *Product*.

productResource.configurations(id) ⇒ `ProductConfigurationResource`

Returns an instance of the *ProductConfigurationResource* for a *ProductConfiguration*.

Kind: instance method of `ProductResource`
Returns: `ProductConfigurationResource` – An instance of the *ProductConfigurationResource* for the product.

Param	Type	Description
id	`string`	The unique identifier of the *Product*.

productResource.parameters(id) ⇒ `ProductParameterResource`

Returns an instance of the *ProductParameterResource* for a *Product*.

Kind: instance method of `ProductResource`

© Ingram Micro, Inc. All Rights Reserved.

Returns: `ProductParameterResource` – An instance of the *ProductParameterResource* for the product.

Param	Type	Description
id	`string`	The unique identifier of the *Product*.

productResource.connections(id) ⇒ `ProductConnectionsResource`

Returns an instance of the *ProductConnectionsResource* for a *Product*.

Kind: instance method of `ProductResource`
Returns: `ProductConnectionsResource` – An instance of the *ProductParameterResource* for the product.

Param	Type	Description
id	`string`	The unique identifier of the *Product*.

productResource.usageRules(id) ⇒ `ProductUsageRuleResource`

Returns an instance of the *ProductUsageRulesResource* for a *Product*.

Kind: instance method of `ProductResource`
Returns: `ProductUsageRuleResource` – An instance of the *ProductUsageRuleResource* for the product.

Param	Type	Description
id	`string`	The unique identifier of the *Product*.

productResource.getTemplates(id) ⇒ `Array`

Returns the list of *Template* objects configured for the *Product*.

Kind: instance method of `ProductResource`
Returns: `Array` – The list of *Template* objects.

Param	Type	Description
id	`string`	The unique identifier of the *Product*.

© Ingram Micro, Inc. All Rights Reserved.

~~productResource.getParameters(id) ⇒ Array~~

Deprecated

Returns the list of *Parameter* objects configured for the *Product*.

Kind: instance method of `ProductResource`
Returns: `Array` – The list of *Parameter* objects.

Param	Type	Description
id	`string`	The unique identifier of the *Product*.

productResource.getItems(id) ⇒ Array

Returns the list of *ProductItem* objects configured for the *Product*.

Kind: instance method of `ProductResource`
Returns: `Array` – The list of *ProductItem* objects.

Param	Type	Description
id	`string`	The unique identifier of the *Product*.

productResource.getConnections(id) ⇒ Array

Returns the list of *Connection* objects configured for the *Product*.

Kind: instance method of `ProductResource`
Returns: `Array` – The list of *Connection* objects.

Param	Type	Description
id	`string`	The unique identifier of the *Product*.
