Subscription Cancellation

This article has been generated from the online version of the documentation and might be out of date. Please, make sure to always refer to the online version of the documentation for the up-to-date information.

Auto-generated at May 30, 2026

Overview

When your customers cancel their subscriptions, new **cancel** fulfillment requests are generated on the CloudBlue Connect platform. In case this request is approved, its corresponding subscription is terminated by the platform.

The initial status of a cancel fulfillment request is *Pending*. It remains in this state until it is processed via the Connect platform or via your deployed middleware. In case a cancel request is successfully processed, its status is changed to *Approved*. Thus, the status of its corresponding subscription will be also switched to *Terminated*.

Vendors can deploy the Processor to approve pending cancel fulfillment request by calling the Vendor API. Therefore, Vendors can terminate active subscriptions via their systems.

Prerequisites

Before following the provided use case, make sure that all of these prerequisites are met:

- Your product is defined on the Connect platform.
- An active subscription is required to create a cancel request.
- The Processor SDK Template is successfully deployed.
- Your deployed Processor is properly configured.
- Vendor API configuration is presented.

Creating Cancel Requests

Cancel fulfillment requests for active subscriptions are created by customers. However, Vendors can also create this request by accessing an active preview subscription. The following steps showcase how to create a cancel request for your generated preview subscription.

1. Access active subscription details

Click on your active preview subscription from the **Subscriptions** module of the Connect platform.

| SUBSCRIPTION | PRODUCT | MARKETPLACE | CUSTOMER | PERIOD | NEXT BILL. | CREATED | STATUS |
|-------------------------------------------------------------------|-------------------------------------|---------------------------------|--------------------------------------|---------|-----------------------|-----------------------|--------|
| AS-2764-1458-2480 Preview External ID: 86EFMSBRLY | Tutorial Product PRD-404-832-779 | Tutorial Marketp... MP-38661 | Schumm and Sons TA-5894-2747-5105 | 1 month | 04/12/2021 8:33 AM | 02/12/2021 7:11 AM | Active |

CloudBlue Connect © 2021 — Ingram Micro Inc. All Rights Reserved. — [Privacy](#) | [Terms of Service](#) - Version 22.0.1709-g0140e07

Your subscriptions are displayed within the **Directory** tab. Make sure that a subscription that you want to cancel is in the *Active* state and it is marked with the **Preview** tag.

2. Launch a Cancel Request Wizard

Open the **Actions** menu from the subscription details screen and click the **Cancel** button.

Subscription details

Status: Active | Subscription: AS-2764-1458-2480 Preview | Request In Progress: - | Product: Tutorial Product (PRD-404-832-779) | Marketplace: Tutorial Marketplace (MP-38661)

CONTROL PANEL | RESERVATION | PAY AS YOU GO | PARAMETERS | DETAILS | TIERS | FULFILLMENT | BILLING

Activation template is used to share details of the successful asset creation with the user. Once purchase request is approved, this template is used to generate user-visible notification.

This template uses [Markdown](#) syntax and allows to use Parameters of the product which has scope 'Asset'.

Formatting

Markdown allows you to control various aspects of the document:

1. Text formatting like **bold** or *italic*
2. Images embedding
3. Lists
4. and more

 - Cancel**

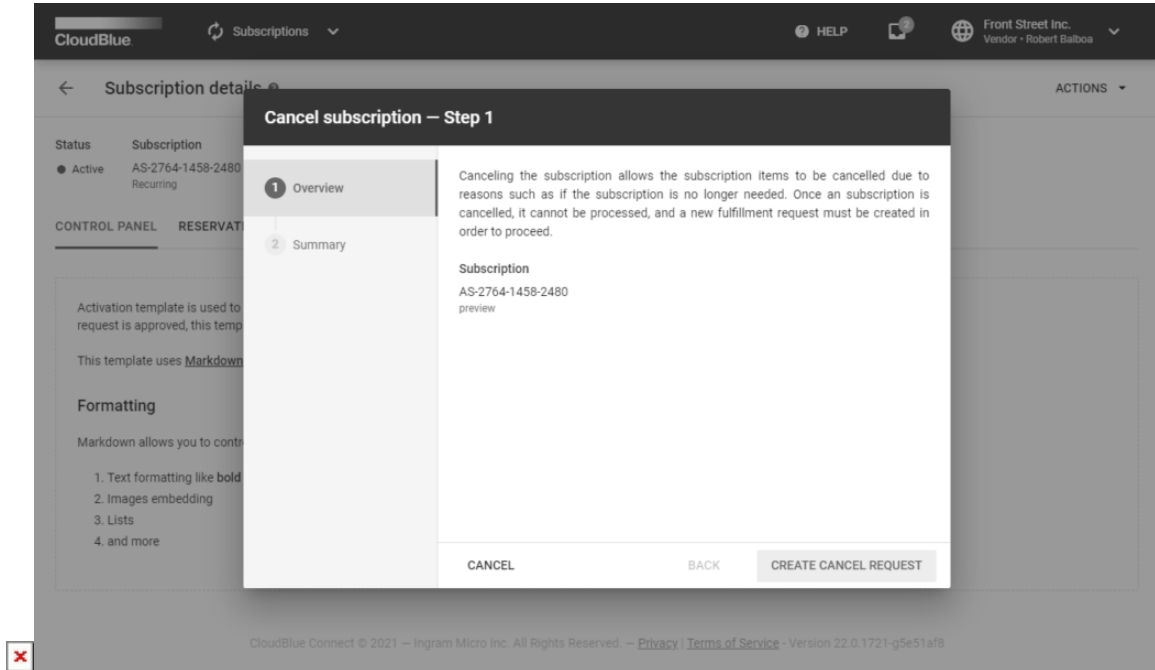

CloudBlue Connect © 2021 — Ingram Micro Inc. All Rights Reserved. — [Privacy](#) | [Terms of Service](#) - Version 22.0.1721-g5e51af8

Follow the wizard steps to successfully create a cancel request.

3. Confirm your Cancel Request creation

Click the **Create Cancel Request** button to confirm your decision.

Therefore, the Connect platform generates a fulfillment request to cancel a subscription.

Code Snippets

Create a script that triggers specific API requests to approve the aforementioned cancel requests. Thus, subscriptions can be cancelled by approving these requests via your configured Processor SDK Template.

Warning

Make sure to copy the right ID of a subscription that should be cancelled.

```
from connect_processor.app.utils.utils import Utils
from cnct import ConnectClient
from typing import Dict

class Cancel:
    # This class is used to manage cancel request in Connect.
```

```
@staticmethod
def process_request(request, client):
    # type: (Dict, ConnectClient) -> Dict
    # This method approves or rejects pending cancel requests

    # Get the fulfillment parameter values from the subscription that needs to be cancelled
    # Note that subscription_id serves as an example of fulfillment parameter ID.
    # The external_subscription_id is used to call the Vendor API and cancel the subscription
    external_subscription_id = Utils.get_param_value(request, 'fulfillment', 'subscription_id')

    # Add your code to Cancel the subscription in vendor system by calling the Vendor API
    # api_client = APIClient(api_url='',
    #                         api_key='')
    # cancel_payload = {}
    # api_client.cancel_subscription(cancel_payload, external_subscription_id)

    # Approve the cancel request with the following code:
    return Utils.approve_fulfillment_request(request, client)
    # If the cancel request is processed successfully, the subscription status is switched to
    Terminated.
    # In case the cancel request can not be processed, reject the request by using
    # the Utils.reject_fulfillment_request method.
```

Summary

Once a fulfillment request to cancel a subscription is processed and approved via your deployed middleware, the Connect platform assigns the Terminated status to this subscription.

The screenshot shows the CloudBlue user interface. At the top, there is a navigation bar with the CloudBlue logo, a 'Subscriptions' dropdown menu, a 'HELP' button, a chat icon, and a user profile for 'Front Street Inc. Vendor - Robert Balboa'. Below this is a breadcrumb trail: 'Subscription details'. The main content area displays a table with subscription information:

| Status | Subscription | Request In Progress | Product | Marketplace |
|------------|--------------------------------|---------------------|-------------------------------------|----------------------------------|
| Terminated | AS-2764-1458-2480 Recurring | - | Tutorial Product PRD-404-832-779 | Tutorial Marketplace MP-38661 |

Below the table is a horizontal menu with options: CONTROL PANEL, RESERVATION, PAY AS YOU GO, PARAMETERS, DETAILS, TIERS, FULFILLMENT, and BILLING. The 'DETAILS' section is expanded, showing an activation template and a list of links for Downloads (Windows) and Documents (Admin Manual). A 'Formatting' section lists: 1. Text formatting like bold or italic, 2. Images embedding, 3. Lists, 4. and more.
