Flowgear Cloudblue Connect Connection

This article has been generated from the online version of the documentation and might be out of date. Please, make sure to always refer to the online version of the documentation for the up-to-date information.

Auto-generated at December 2, 2020

To use the node Cloudblue Connect, is necessary first at all, to create a connection.

To create the connection follow those steps:

Go to the Provider or Vendor portal -> Extensions -> Tokens -> + CREATE TOKEN

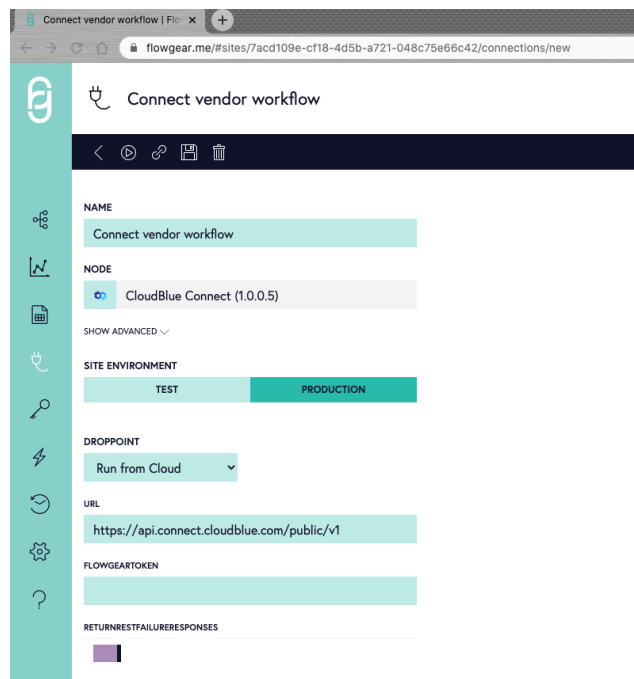

Go to Flowgear platform -> Connections -> + to create a new connection.

Fill the name and select Cloudblue Connector.

Choose your Environment Site (TEST or PRODUCTION)

To fill the URL field, go to Connect Portal -> Extensions -> General and copy the API ENDPOINT value

To complete the FLOWGEARTOKEN go to Connect Portal -> Extensions -> Tokens and copy the API Key that was generated. To copy use the icon, please don't use CTRL+C.

Then Save and Test.
