CloudBlue Connect (shortly, Connect) is an automation platform that enables partners to build complex supply chain applications and integrate those into various business scenarios.

Concepts

Watch the following video to get familiar with the business concepts and flows:

Try the CloudBlue Connect Concepts quiz to evaluate your understanding of concepts.

Recommendations

If you are new in Connect, the recommended way to learn it is to go through the following steps:

1. Get familiar with the terminology and main business flows in Introduction.
2. Get familiar with Connect UI concepts in Portals.
3. Gain provider and vendor skills by going through the closely related tutorials: Provider Tutorial and Vendor Tutorial. Here, you should keep open the Provider Portal and Vendor Portal as well as both tutorials to change your role to Provider or Vendor at certain points.

If your need to update your knowledge on a certain flow or an operation, feel free to navigate to the one within those tutorials using the left-hand navigation panel in this tutorial set.
