# Activating Product Listing

This article has been generated from the online version of the documentation and might be out of date. Please, make sure to always refer to the online version of the documentation for the up-to-date information.

Auto-generated at January 16, 2021

### Switch Point

You come here after completing the creation of the product listing request while working as the vendor. Now, it is the provider's responsibility to complete the product flow.

### Information

A request for product listing in a marketplace requires the marketplace owner (a provider) to prepare the product exposure in their commerce system and then approve this request.

## Publish the Product on the Marketplace

### 1. Locate the request for product listing

In the Listing main page open the Requests tab and find the listing request from your vendor:

ID	Created	Completed	Type	Product	Version	Marketplace	Status
LSTR-222-378-321-001	06/23/2020 6:43 AM	—	New	Apollo Pulse PRD-013-767-828	1	France MP-79795	Reviewing

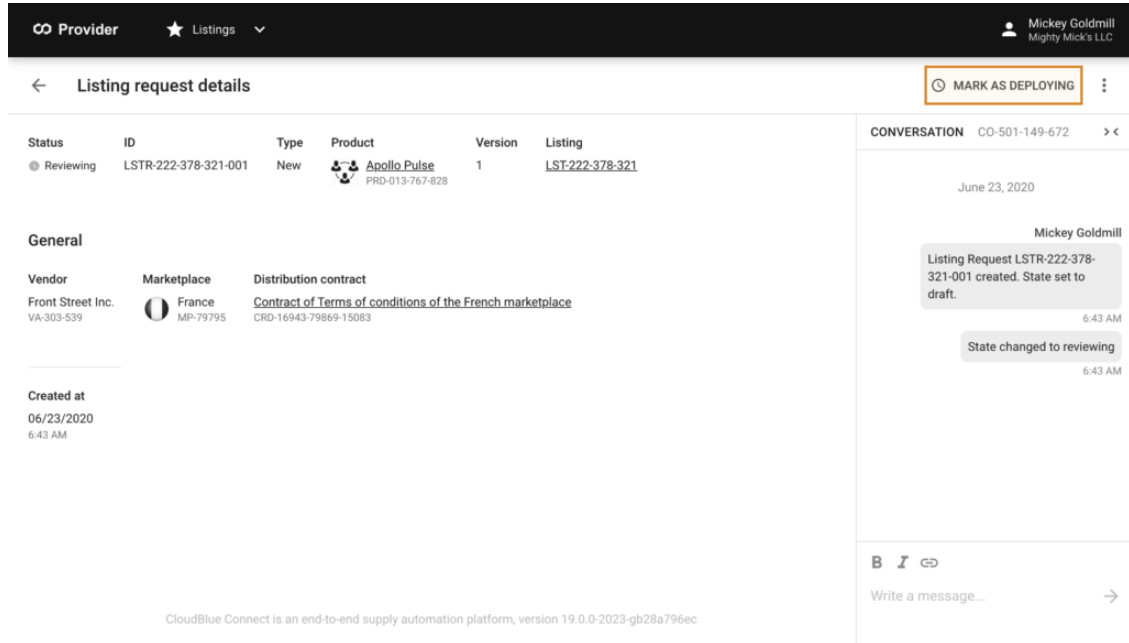

Rows per page: 10 1-7 of 7

CloudBlue Connect is an end-to-end supply automation platform, version 19.0.0-2023-gb28a796ec

The request status is **Reviewing**. Click the request ID to view the details.

## 2. Start the product deployment

Review the Listing Request Details screen:

The screenshot displays the 'Listing request details' interface. At the top, there is a navigation bar with 'Provider' and 'Listings' tabs, and a user profile for Mickey Goldmill. The main content area shows a table with the following data:

Status	ID	Type	Product	Version	Listing
Reviewing	LSTR-222-378-321-001	New	Apollo Pulse PRD-013-767-828	1	LST-222-378-321

Below the table, the 'General' section includes:

- Vendor:** Front Street Inc. VA-303-539
- Marketplace:** France MP-79795
- Distribution contract:** Contract of Terms of conditions of the French marketplace CRD-16943-79869-15083
- Created at:** 06/23/2020 6:43 AM

A 'MARK AS DEPLOYING' button is highlighted in the top right corner. On the right side, a conversation log shows a message from Mickey Goldmill: 'Listing Request LSTR-222-378-321-001 created. State set to draft.' followed by a system message: 'State changed to reviewing'.

Click **Mark as Deploying** and start the product deployment on your marketplace. The request status is changed to **Deploying**.

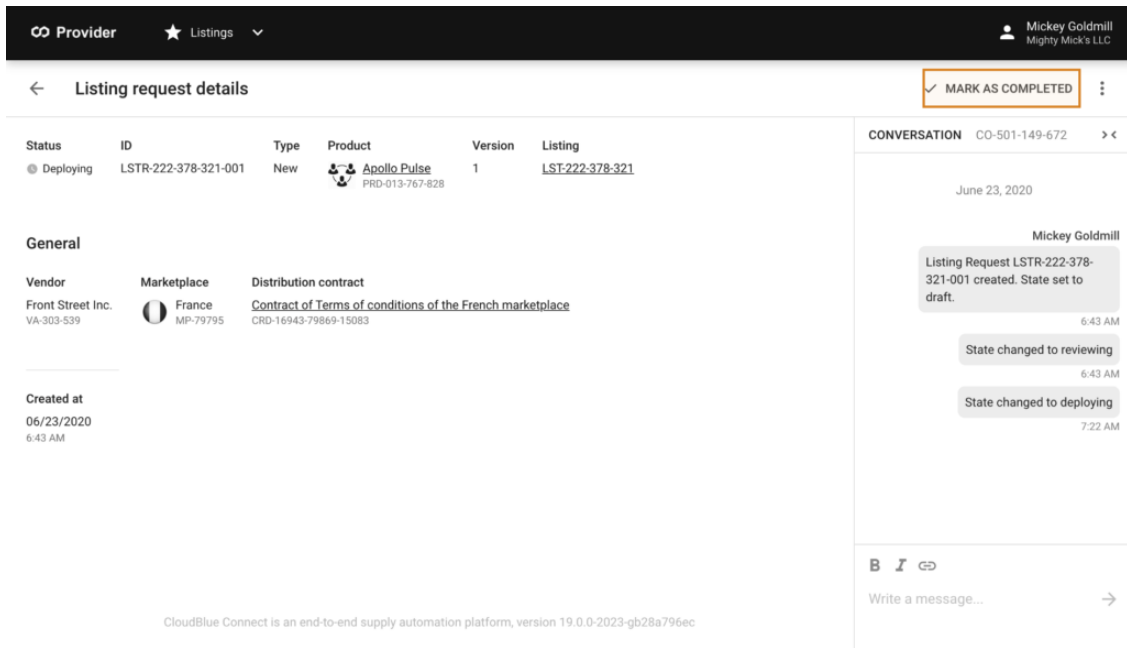

### Information

The exact steps of a product deployment depend on the commerce system, and typically it involves exposing the product on the marketplace with the needed marketing data and setting the commercial terms. In some cases, providers run a few test requests to validate the product before making the product available for sale.

## 3. Complete the product deployment

After the product deployment, mark the listing request as completed:

Provider Listings Mickey Goldmill Mighty Mick's LLC

Listing request details MARK AS COMPLETED

Status	ID	Type	Product	Version	Listing
Deploying	LSTR-222-378-321-001	New	Apollo Pulse PRD-013-767-828	1	LST-222-378-321

**General**

Vendor: Front Street Inc. VA-303-539

Marketplace: France MP-79795

Distribution contract: [Contract of Terms of conditions of the French marketplace](#)

June 23, 2020

Mickey Goldmill

Listing Request LSTR-222-378-321-001 created. State set to draft. 6:43 AM

State changed to reviewing 6:43 AM

State changed to deploying 7:22 AM

CloudBlue Connect is an end-to-end supply automation platform, version 19.0.0-2023-gb28a796ec

Click **Mark as Completed**. The request status is changed to **Completed**.

## Conclusion

This is the end of the product flow that you went through from end to end. As the vendor, you created a product with all its settings and then requested the provider to list the product in their marketplace. Finally, in the provider role, you completed the product deployment and marked the listing request as completed.

Continue working as the provider to request the product that you exposed to a marketplace. Follow instructions in [Ordering a Product](#).
