Release Date: **May 1, 2019**

CloudBlue Enterprise Extension

- Integration with CloudBlue Enterprise is now available through the Connect CB Extension.
- For additional information and installation instructions, please visit CB Enterprise Connect Extension Overview.

Brand new product catalog module view

New user interface for the product view within the catalog module to allow for sorting and additional information display.

Pay-as-you-go products support to the APS Application

Connect now supports Odin Automation's usage collection feature by calling Connect's Usage Collection API to retrieve the resource usage per tenant and sending that information to OA.

Request details grouping

Grouping of Request Details content in the Fulfillment Request for easier consumption of information

Account categorization

New optimized categorization of existing Account details in the Account module: General and Users.

Product versioning

Vendors can now create and identify published versions of their product in the newer, robust 'Versions' section of the inventory module.

Mobile Support

All portal functions can now be rendered and executed in mobile / tablet web browsers.

Other stability and functionality improvements
