v19.2 Release Notes

This article has been generated from the online version of the documentation and might be out of date. Please, make sure to always refer to the online version of the documentation for the up-to-date information.

Auto-generated at January 13, 2026

Release Date: **May 01, 2020**

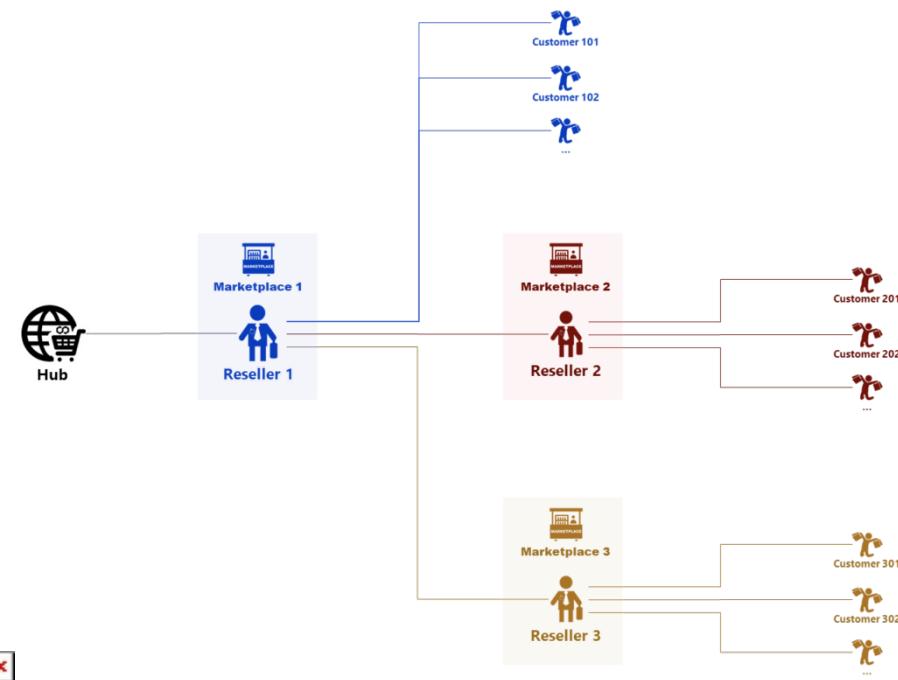

Improved Parameters Performance

In addition to continuous performance improvements with every release, we've managed to make parameters handing in the Assets Management Module even faster.

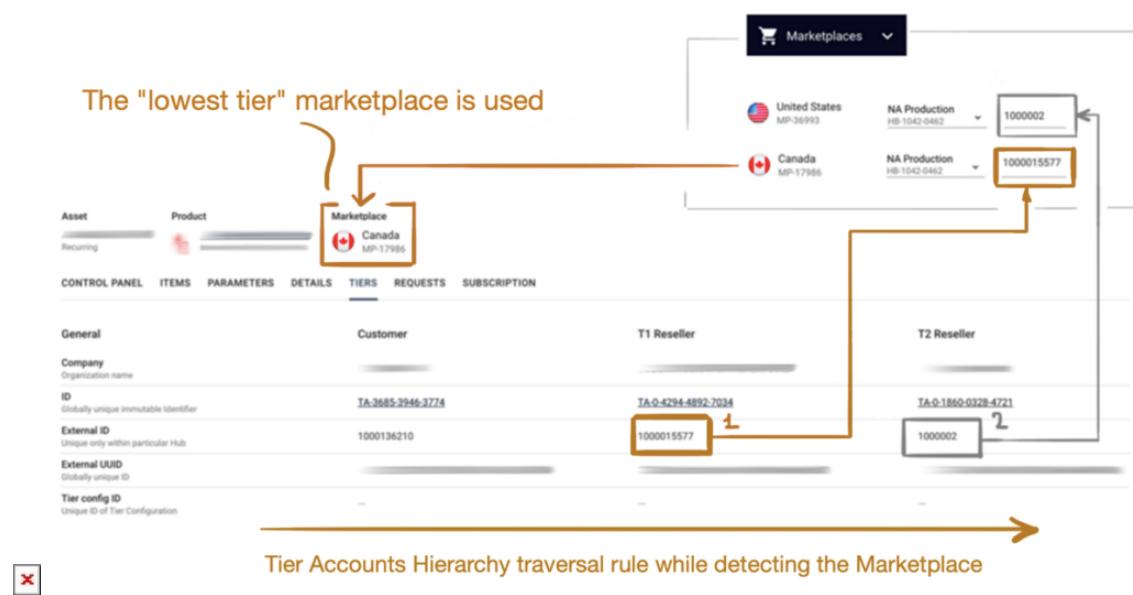

This update improves API and Portal performance of the parameter-related operations up to 4 times on some workloads.

Overlapping Marketplaces Support

Prior to this update, our logic of the “marketplace detection” based on Tiers information did not allow for overlapping configurations; i.e. it was not possible to use “Marketplace 1” in the logical configuration illustrated by the following diagram:

With this update we've removed this limitation and such configurations are now possible with the following traversal rule:

I.e. our marketplace detection algorithm now traverses the tier accounts hierarchy “bottom-up” and the first marketplace that is detected is used.

Product Management UI in the CB Commerce Extension

Our Extension for the CloudBlue Commerce has been enhanced to support complete Product Lifecycle Management operations (initial installation and upgrades).

It is now possible to not only review the configuration of connectivity to the Provider and health check capabilities, but also to discover products that are available for deployment with the native interface of the Provider Control Panel of the CloudBlue Commerce:

Provider Control Panel v2

CloudBlue Connect

Configuration management and health check

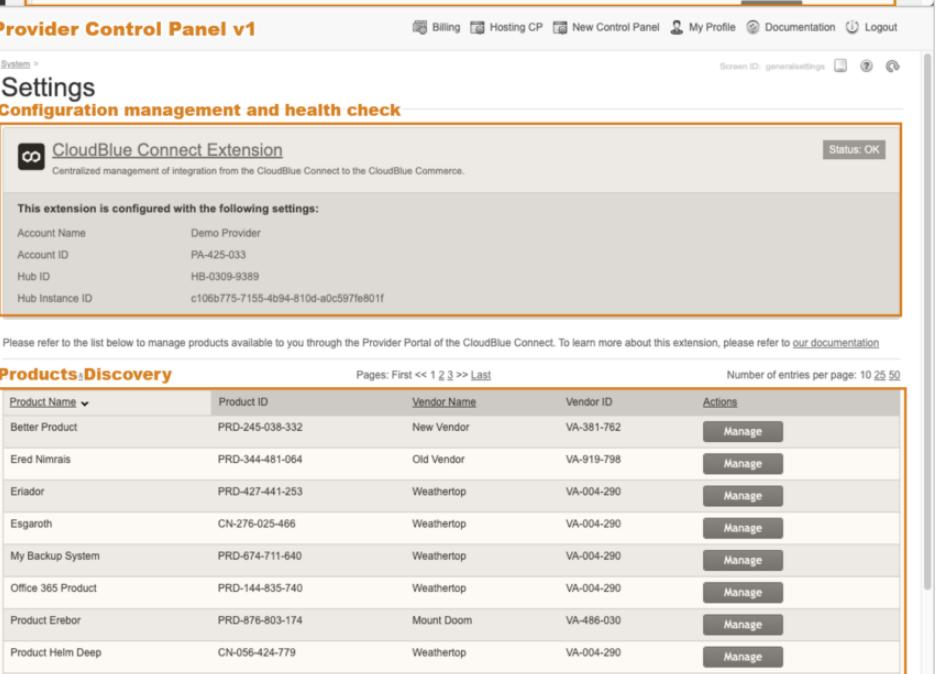

CLOUDBLUE CONNECT EXTENSION  READY

Account Name	Account ID
Demo Provider	PA-425-033
Hub Instance ID	Hub ID
c106b775-7155-4b94-810d-a0c597fe801f	HB-0309-9389

Please refer to the list below to manage products available to you through the Provider Portal of the CloudBlue Connect. To learn more about this extension, please refer to [our documentation](#)

Products:Discovery

Product Name	Product ID	Vendor Name	Vendor ID	Actions
Better Product	PRD-245-038-332	New Vendor	VA-381-762	
Ered Nimrais	PRD-344-481-064	Old Vendor	VA-919-798	
Eriador	PRD-427-441-253	Weathertop	VA-004-290	
Esgaroth	CN-276-025-466	Weathertop	VA-004-290	
My Backup System	PRD-674-711-640	Weathertop	VA-004-290	
Office 365 Product	PRD-144-835-740	Weathertop	VA-004-290

CloudBlue Connect Extension

Centralized management of integration from the CloudBlue Connect to the CloudBlue Commerce.

Status: OK

This extension is configured with the following settings:

Account Name	Demo Provider
Account ID	PA-425-033
Hub ID	HB-0309-9389
Hub Instance ID	c106b775-7155-4b94-810d-a0c597fe801f

Please refer to the list below to manage products available to you through the Provider Portal of the CloudBlue Connect. To learn more about this extension, please refer to [our documentation](#)

Products:Discovery

Product Name	Product ID	Vendor Name	Vendor ID	Actions
Better Product	PRD-245-038-332	New Vendor	VA-381-762	
Ered Nimrais	PRD-344-481-064	Old Vendor	VA-919-798	
Eriador	PRD-427-441-253	Weathertop	VA-004-290	
Esgaroth	CN-276-025-466	Weathertop	VA-004-290	
My Backup System	PRD-674-711-640	Weathertop	VA-004-290	
Office 365 Product	PRD-144-835-740	Weathertop	VA-004-290	
Product Erebor	PRD-876-803-174	Mount Doom	VA-486-030	
Product Helm Deep	CN-056-424-779	Weathertop	VA-004-290	

Both versions of the Provider Control Panel (PCP) of the CloudBlue Commerce are supported for the Installation and Upgrade scenarios implementing the following workflows.

Product Installation

```

graph LR
    New((New)) --> Import[Import Application Package]
    Import --> CreateApp[Create Application Instance]
    CreateApp --> CreateSRTs[Create System RTs]
    CreateSRTs --> CreateItemRTs[Create Item RTs]
    CreateItemRTs --> CreateST[Create ST and Apply Limits]
    CreateST --> Completed[Completed]
    
```

The diagram illustrates the five-step workflow for product installation:

- New**: The starting point.
- Import Application Package**: Step 1.
- Create Application Instance**: Step 2.
- Create System RTs**: Step 3.
- Create Item RTs**: Step 4.
- Create ST and Apply Limits**: Step 5.
- Completed**: The final state.

Annotations below the steps indicate the services used:

- Step 1: Application Service Reference
- Step 2: Application Service
- Step 3: Application Counted Reference
- Step 4: Application Counted Reference
- Step 5: Application Counted Reference
