v25 Release Notes

This article has been generated from the online version of the documentation and might be out of date. Please, make sure to always refer to the online version of the documentation for the up-to-date information.

Auto-generated at January 15, 2025

Release Date: **April 19, 2022**

This release brings new and enhanced features, improved performance, better stability, smoother workflows, and a richer user experience on CloudBlue Connect.

1. CloudBlue Connect Platform

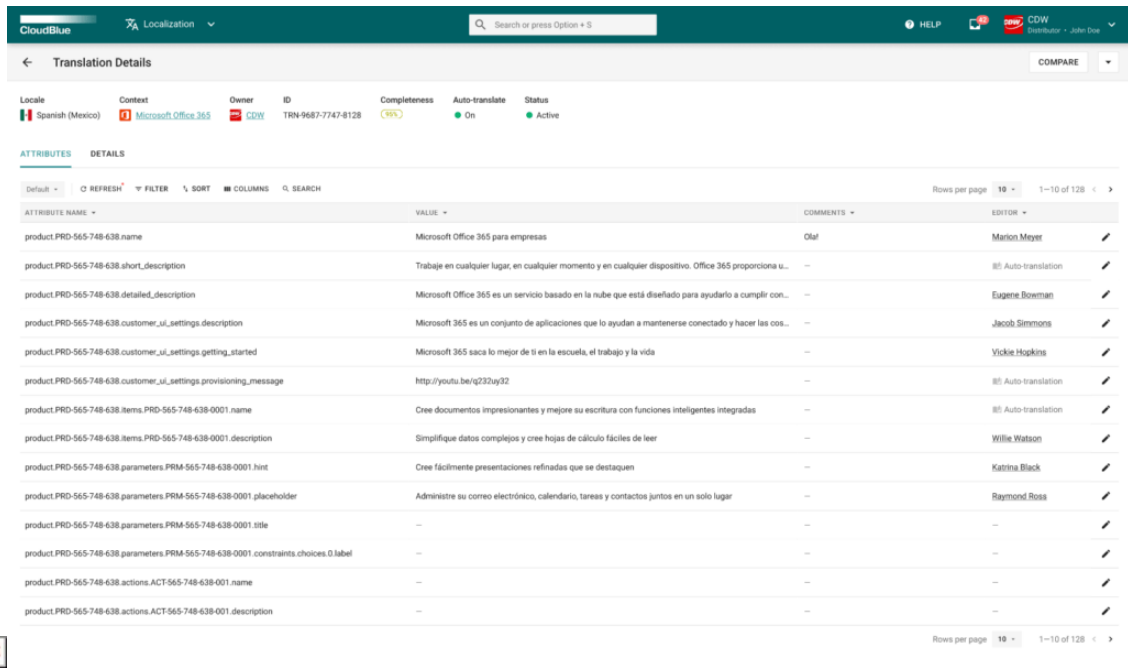

1.1 New Localization Management Module

Connect now supports localization of products' attributes. With the new Localization module, vendors and distributors are able to create localized translations of the product definition in various supported languages. Users are able to input their own translations in various aspect of the product definitions, such as items, parameters, embedding experiences, and others. Distributors can also now configure associated languages to their respective marketplaces in their Marketplaces module.

CONTEXT	ENGLISH	SPANISH	GERMAN	FRENCH	RUSSIAN	KAZAKH
Microsoft Office 365 Product	TRN-4153-4819-8351 By Microsoft	TRN-4446-2489-6642 By Microsoft	TRN-8358-7731-3989 By CDW	TRN-5842-1697-4340 By CDW	-	-
Apple MacBook Air with Apple M1 Chip Product	TRN-2180-6161-3683 By Apple	TRN-3679-6316-3342 By Apple	TRN-2740-3243-7642 By Apple	TRN-6124-2120-6962 By Apple	-	-
Customer Portal Portal	TRN-4056-7962-4457 By CDW	TRN-2192-1271-1786 By CDW	TRN-3853-1565-5374 By CDW	TRN-8206-5177-3952 By CDW	-	-

Users will also be able to compare between translated strings, see progress completion, import & export definitions, clone, and choose the primary language for these translations. Distributors will be able to see these submitted localization in the product definition in the new Localization tab.

The screenshot shows the 'Translation Details' page in the CloudBlue Localization interface. At the top, there's a navigation bar with 'CloudBlue', 'Localization', a search bar, and user information for 'CDW Distributor - John Doe'. Below this, the 'Translation Details' header includes a 'COMPARE' button and a dropdown menu. The main content area shows metadata for a translation: Locale (Spanish (Mexico)), Context (Microsoft Office 365), Owner (CDW), ID (TRN-9687-7747-8128), Completeness (95%), Auto-translate (On), and Status (Active). Below the metadata, there are tabs for 'ATTRIBUTES' and 'DETAILS'. The 'DETAILS' tab is active, displaying a table with columns for 'ATTRIBUTE NAME', 'VALUE', and 'COMMENTS'. The table lists various attributes for 'product-PRD-565-748-638' such as 'name', 'short_description', 'detailed_description', and 'customer_ui_settings.description'. Each row includes the attribute name, its value, and the user who translated it, with an edit icon. At the bottom right of the table, there's a 'Rows per page' dropdown set to 10 and a '1-10 of 128' indicator.

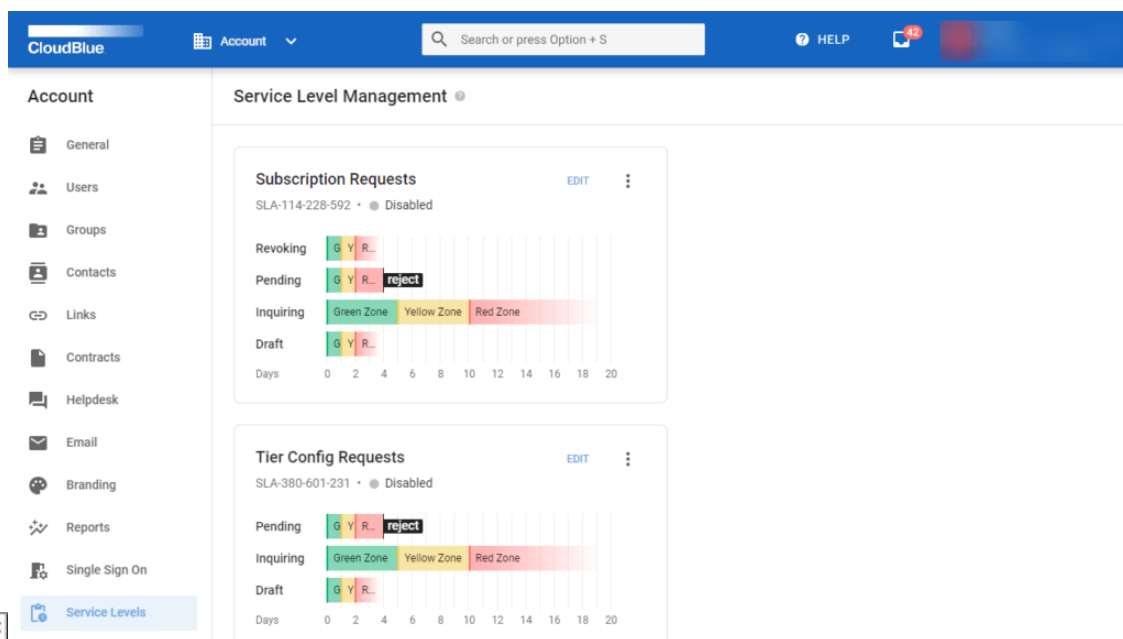

Read more about Localization here.

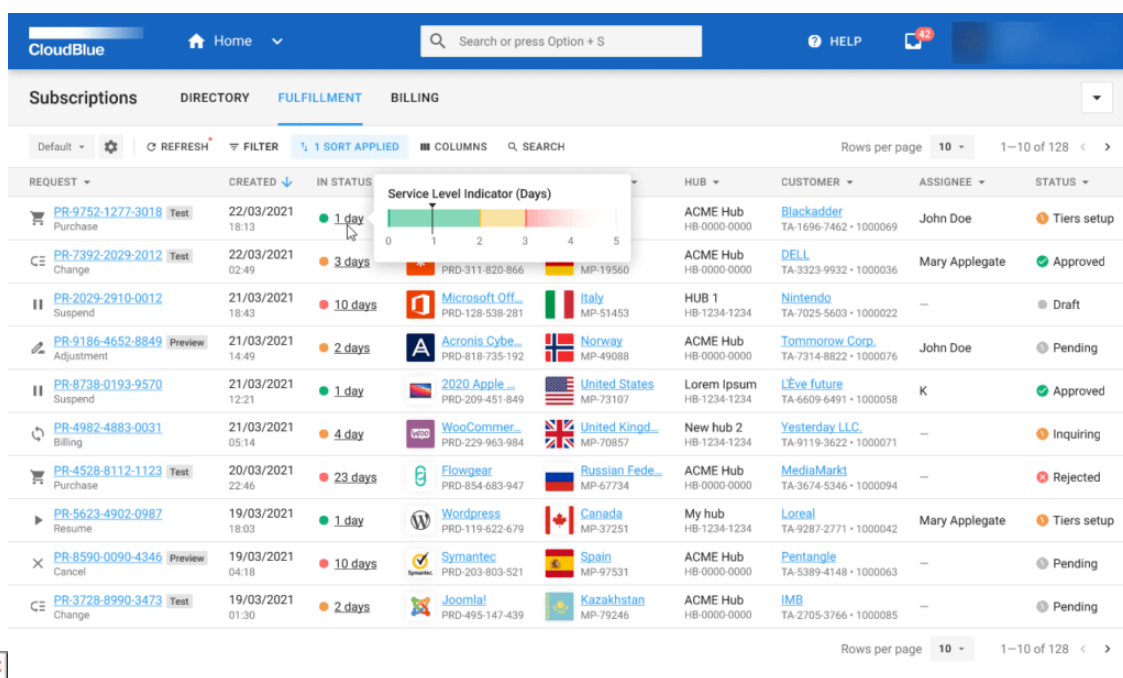

Please note that the new localization module is not currently supported by the CBC Extension and will be supported in a future version of the extension.

1.2 New Service Level Agreement (SLA) Functionality

Users will now see a new Service Levels tab in their Account module. This new tab allows companies to set their account-wide expected service levels for Subscription Requests and Tier Config Requests and their respective states. By defining the three “zones” of green, yellow, and red in days allowed in those zones, users can also automate a notification email that the request has been moved to a new zone and action should be done upon the request in question.

Both vendors and distributors will also see a new column in their Subscriptions Fulfillment tab, labeled “In Status” which will allow users to quickly see which fulfillment requests are in which colored SLA zone. This will allow users to quickly see which requests require the most immediate action.

Read more about Service Level Management here.

1.3 New Portal Brands Management Capabilities

Self-service branding is now available in the Distributor & Reseller portals. In the new Branding tab in the Account module,

Distributors & Resellers are able to configure their Connect branding for their Distributor/Reseller Portal and their Customer Portals.

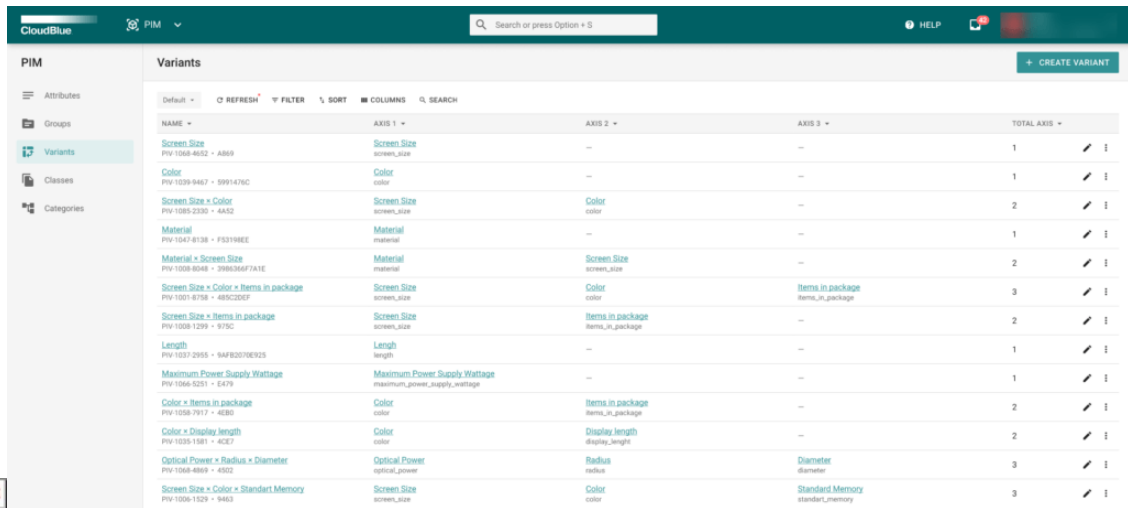

Branding configurability includes the titles, color scheme, icons and logos, and domains. Customer portals can also be branded for each marketplace that the Distributor has configured.

Read more about Branding here.

1.4 Additional Product Information Management (PIM) Capabilities

Connect's PIM functionality now supports the additional dimensions of Item-Attributes scope and Variants.

The new Item-Attribute scope will allow distributors to create attributes that are configured for Items specifically. Along with the available Product-Attribute scope, Distributors and Vendors alike will be able to specifically configure attributes as they need for either Product-level or Item-level details.

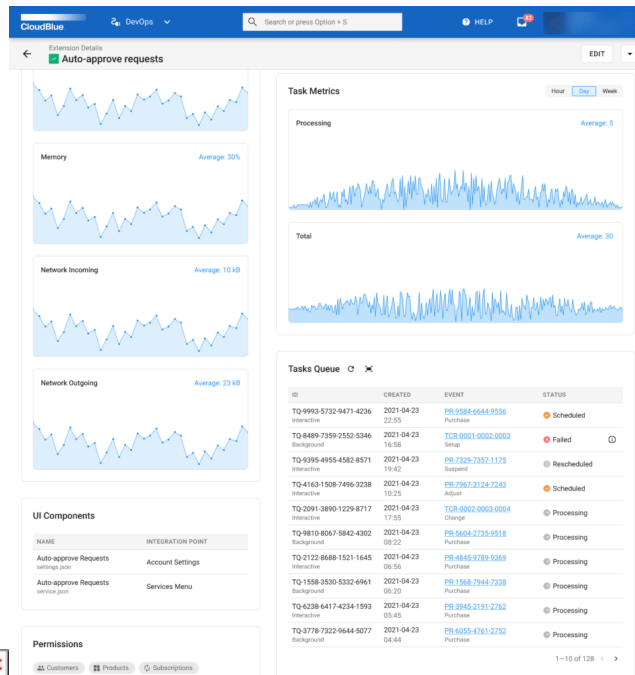

NAME	AXIS 1	AXIS 2	AXIS 3	TOTAL AXIS
Screen Size PIV-1068-4652 - A869	Screen Size screen_size	--	--	1
Color PIV-1039-9407 - 5991-K79C	Color color	--	--	1

Screen Size + Color + Standard Memory PIV-1006-1028 - 9483	Screen Size screen_size	Color color	Standard Memory standard_memory	3

Additional PIM functionality that is now available is the new dimension of Variants. Distributors will now be able to create Variants – or the combination of multiple Item-Attributes. This will allow Distributors to create specific variations of items, which can then be associated with Classes or Categories. This will allow Vendors to input specific attributes that’s listed for that chosen Class and/or Category that the Variant is associated with.

1.5 Extension-as-a-Service (EaaS) and DevOps Module Improvements

DevOps users can now enable the new Logs Archiving feature in their account. Users will see a new DevOps tab in their Account module to configure and enable their log archiving in their Azure environment.

Users will also see additional information in their Extension Details pages in the DevOps module. New information include the Task Metrics section, which displays the number of different running tasks in a given time frame, and additional information

displayed as it relates to Tasks Queue and Schedules.

1.6 Offers Management Improvements

1.6.1 Increased Offer description character count

The Offer description field now has an increased character count of 1000, up from 200.

1.6.2 Increased Offer description character count

The Offer Plan name field now has an increased character count of 256, up from 32.

1.6.3 Items selection filtering

Users are now able to filter and search for specific items when adding an item to a specific plan.

1.6.4 Additional billing periods

Available billing periods now include 7 day trial and 14 day trial lengths. Trials may also be added to all plans within an offer.

1.6.5 Additional feature icons

Users are now able to select additional icons to better represent the features within their plan.

1.7 Other Changes

1.7.1 Ability to show more than 100 product items per table

Users can now view all product items within a single view, a change from 100 max per page.

1.7.2 Helpdesk Module notifications

Changes made to the properties of Helpdesk cases will now be detailed and shown in the comment section of the case.

1.7.3 Objects Explorer

Users can now browse the new Objects Explorer page in Connect's Community. This detailed section allows users to view all the different Object's and their respective status states within the Connect platform.

2. CloudBlue Connect Extensions

2.1 New AppDirect Extension

CloudBlue Connect now supports AppDirect – see CloudBlue Connect AppDirect Extension for details

2.2 Updated CloudBlue Commerce Extension

Please see CB Commerce Extension v25 Release Notes for detailed information about CloudBlue Commerce Extension v25 release details.
