Release Date: **September 19, 2025**

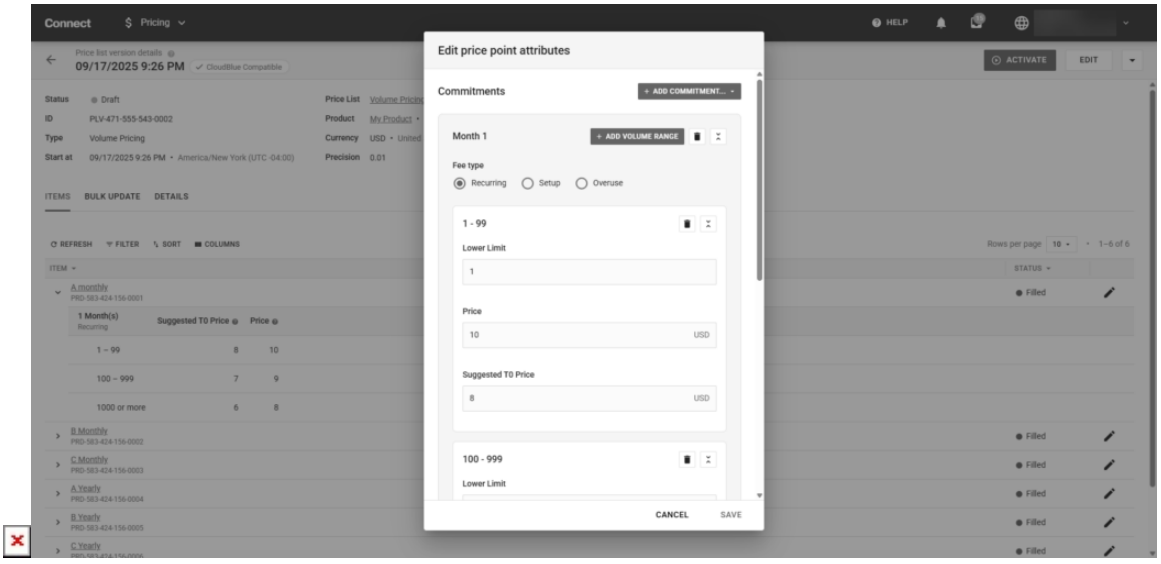

This release brings new and enhanced features, better scalability, smoother workflows, and a richer user experience on Connect.

1. CloudBlue Connect® Platform

1.1 Volume Price List Support

Partners can now configure volume price lists, which allows tiers prices to be dictated by the volume of product item quantity sold. This supports vendors with more complex pricing schemes and distributors to accurately receive those price lists.

New CloudBlue Commerce specific fields here include **Fee Type** and **Subscription Period**, which is set up with each product

item.

1.2 CloudBlue Offers Improvements

As part of CloudBlue Offers, plan creation will include a more simplified user experience to help partners get started quicker and easier. For our more advance users, the full experience will be available via toggle switch within the same plan creation experience.

>
> This new experience will be available for all users later this month (September 2025)

1.3 Fulfillment Request Logic Queue

CloudBlue Connect® can now facilitate multiple simultaneous orders against the same subscription / asset. This feature provides support for enterprise level customers with multiple points of entry for subscription changes. Previously, any pending request must be processed before another request can be placed against the same subscription / asset.

1.4 Additional data store region support

CloudBlue Connect® now supports data store in the Middle East region to ensure operational efficiency and compliance to partners within the region and the area that surrounds it.

1.5 Performance & Security Updates

We have enhanced multiple aspects of our platform to boost performance, optimize operational efficiency, and strengthen security across various areas.

2. CloudBlue Connect® and Hyperscalers

2.1 Updated Azure and AppSource Marketplace Landing Page

End customers will now see a more intuitive and user friendly landing page if they are misdirected from the marketplace.
