v11 Release Notes

This article has been generated from the online version of the documentation and might be out of date. Please, make sure to always refer to the online version of the documentation for the up-to-date information.

Auto-generated at January 16, 2021

Release Date: **July 20, 2018**

Fulfillment Management Module API

- Ability to automate requests processing
- API Management Module was introduced with the technical information required to facilitate API usage (URLs, Keys)
- Please see Fulfillment Management Module for more details

Provider invitation codes added

- Existing invitation URLs functionality has been replaced with the invitation codes

Dropdown parameter type has been added

- Parameters management experience (Product > Model > Parameters) has been reworked to support new type
- New type allows creation of multiple predefined choices that customer will be asked to specify
- New type support added into all scenarios: order capturing, fulfillment

Support for the 3-tiered Resellers hierarchy has been added

- Information of up to 3-tiers of Resellers can now be displayed in the request details screen
- Note that information is only visible in case the “Show reseller information” is turned on for the product

Other Improvements

- Account module now only displays information about the currently selected account (in case user is a part of multiple accounts)
- Accounts selector (dropdown in the top right corner) was reworked to simplify its usage
- Other stability and functionality improvements
