#### Release Date: March 14, 2025

×

This release brings new and enhanced features, better scalability, smoother workflows, and a richer user experience on Connect.

## **1. CloudBlue Connect Platform**

#### **1.1 Product Guidelines**

CloudBlue Connect now supports product guidelines in the product module. Vendors can now set up product guidelines on how their products can be sold in terms of product items relationship.

These product guidelines allow Vendors to dictate how a specific item relates to another item. For example, an (add-on) item must be purchased with another (base) item.

CloudBlue.	ducts v			@ HELP	٠	Vendor - Connect Team

Vendors can set up the product guidelines by going into the specific product page within the product module.

Read more about Product Guidelines here.

## **1.2 Explicit Product Trial Support**

CloudBlue Connect has expanded support for additional billing periods within a product's items. Vendors can now select specific trial billing periods for their trial-specific items. These new billing periods include: **7 days trial**, **14 days trial**, **30 days trial**, **and 1 month trial**.

## **1.3 Whitelist IP Filtering**

Accounts within the CloudBlue Connect platform can now setup "Allowed IP Rules" on an account level for their users. This means that security administrators of the account can set up a singular IP or an IP address range that their users can access from.

The whitelist IP filtering, combined with other Connect security features, allows Connect account administrators to ensure that their account is only accessed by users that are privileged to access their Connect Portal.

CloudBlue.			🕑 HELP 🌲	C 🗠	Distributor - Connect Team

#### **1.4 Product Offline Mode**

Products configured in CloudBlue Connect now supports Offline mode. Offline mode is useful for platform operators that may require unique/one-time changes to be made to subscriptions for that product – such as changes from a subscription migration from another platform. These changes are completely restricted to within the CloudBlue platforms.

Offline mode can be accessed within the product configuration page within the settings tab.

#### **1.5 CloudBlue Offers Improvements**

As part of CloudBlue's End to End Catalog Management, we have introduced various new features and improvements to our CloudBlue Offers functionality, which includes (but not limited to) the following:

- Localization of service plan names and descriptions within a Plan
- Support for trials in a product item configuration and CloudBlue Offer Plans
- End of Sale status for CloudBlue Offers Plans
- Improved user interfaces
- Other miscellaneous improvements and updates

#### **1.6 Performance & Security Updates**

We have enhanced multiple aspects of our platform to boost performance, optimize operational efficiency, and strengthen security across various areas.
