v41 Release Notes

This article has been generated from the online version of the documentation and might be out of date. Please, make sure to always refer to the online version of the documentation for the up-to-date information.

Auto-generated at April 18, 2026

Release Date: **March 4, 2026**

This release brings new and enhanced features, better scalability, smoother workflows, and a richer user experience on Connect.

1. CloudBlue Connect Platform

1.1 Brand New Packs Module

CloudBlue is proud to introduce the brand new Packs module in the Connect platform! This new functionality within the portal allows Distributors to configure marketplace and agreement specific Reseller Packs that provides associated Resellers the proper price list when registering and setting up a specific product for multi-tier distribution.

Product Description
We are happy to provide you the Cloud Service – an ultimate solution for your company. Stop using the legacy on-premises solution on your computer. Move to the cloud with our help.

Getting Started Instructions
You are now ready to use the Cloud Service and migrate the

1.3 Preferred Vendor Name and Product Name

Vendors can configure an optional preferred Vendor name and product name for their account and products. This is useful for partners that may share different lines of business units within the same CloudBlue account.

1.4 Fulfillment Request External ID

External ID fields are now available within each fulfillment request within a subscription asset. This field is configurable only by API.

1.5 Catalog Module Enhancement

We have enhanced the catalog module for Distributors and Resellers. This updated experience allows our partners to quickly and easily find vendors and details about their products available in the catalog.

1.6 Performance & Security Updates

We have enhanced multiple aspects of our platform to boost performance, optimize operational efficiency, and strengthen security across various areas.
