Reports

This article has been generated from the online version of the documentation and might be out of date. Please, make sure to always refer to the online version of the documentation for the up-to-date information.

Auto-generated at July 16, 2024

The **Reports** section of the Account module is used to manage custom report templates and view statistics and other information for all report templates. Furthermore, this section allows adding and managing your repositories that are used to define new report templates. Namely, added report templates enable Connect users to generate custom report files that contain required Connect data. The following describes the Reports section user interface and provides instructions on how to add your repository and manage your custom templates.

Repository

Proceed to the **Repository** tab to review and manage your existing repositories. Add your new repository with your custom report templates as described below.

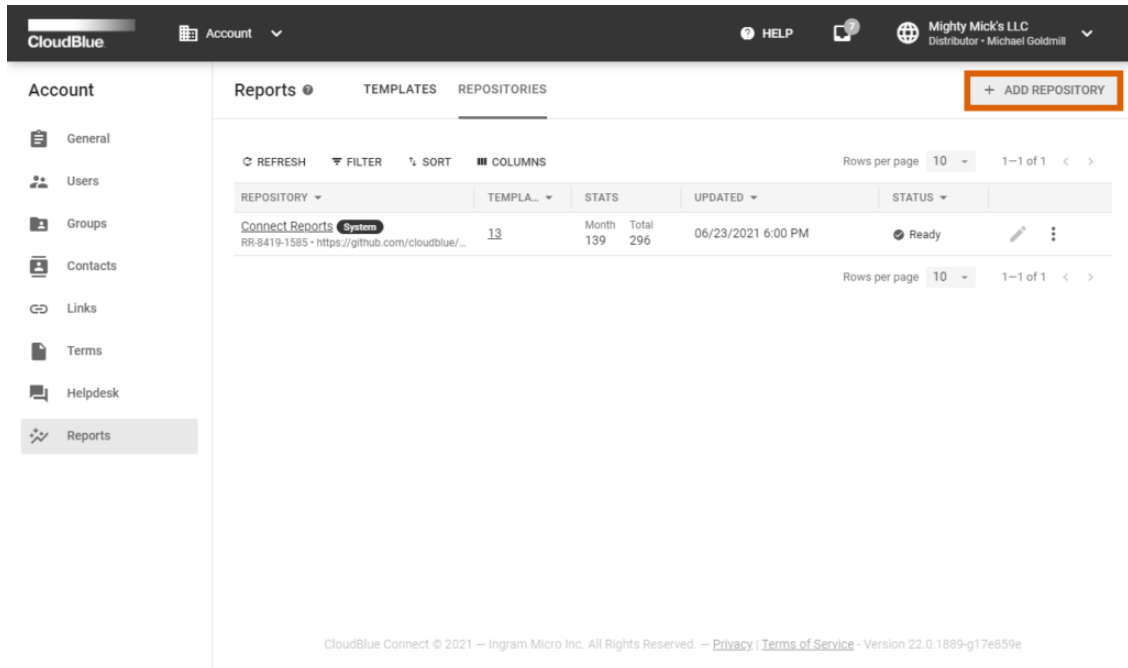

Connect Reports SDK

Create custom report templates by following the instructions from the Connect Reports SDK documentation on the Connect Community page. Once your custom report templates are created successfully, upload these templates to your Git repository and add it to the Connect platform as described below.

Adding Repositories

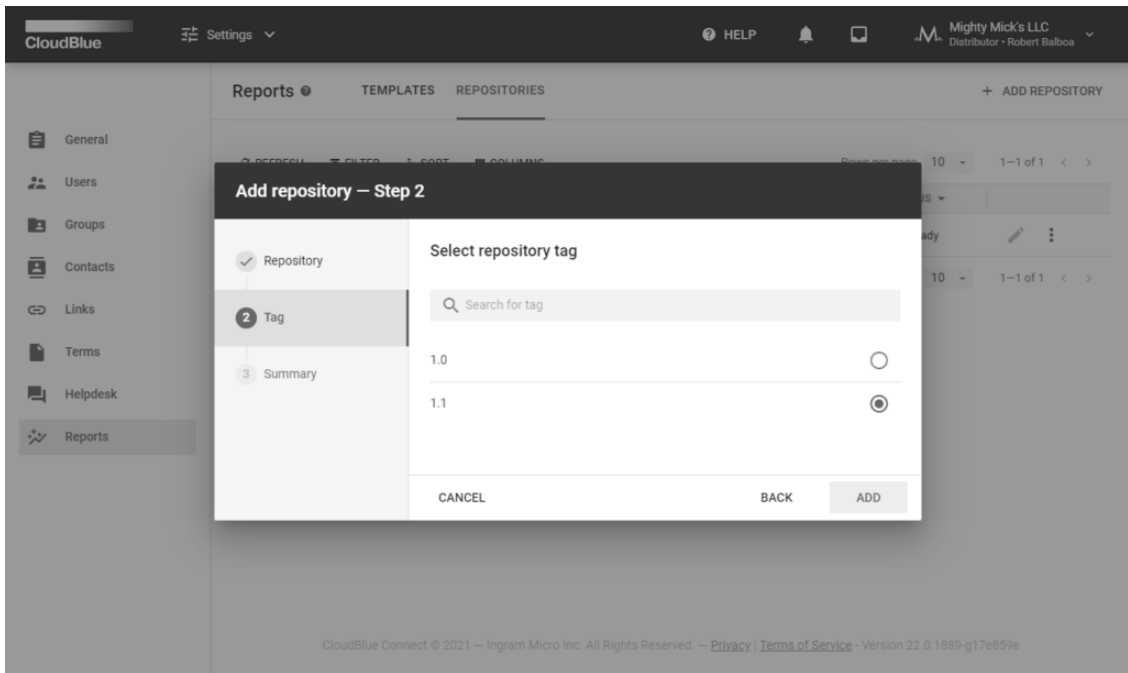

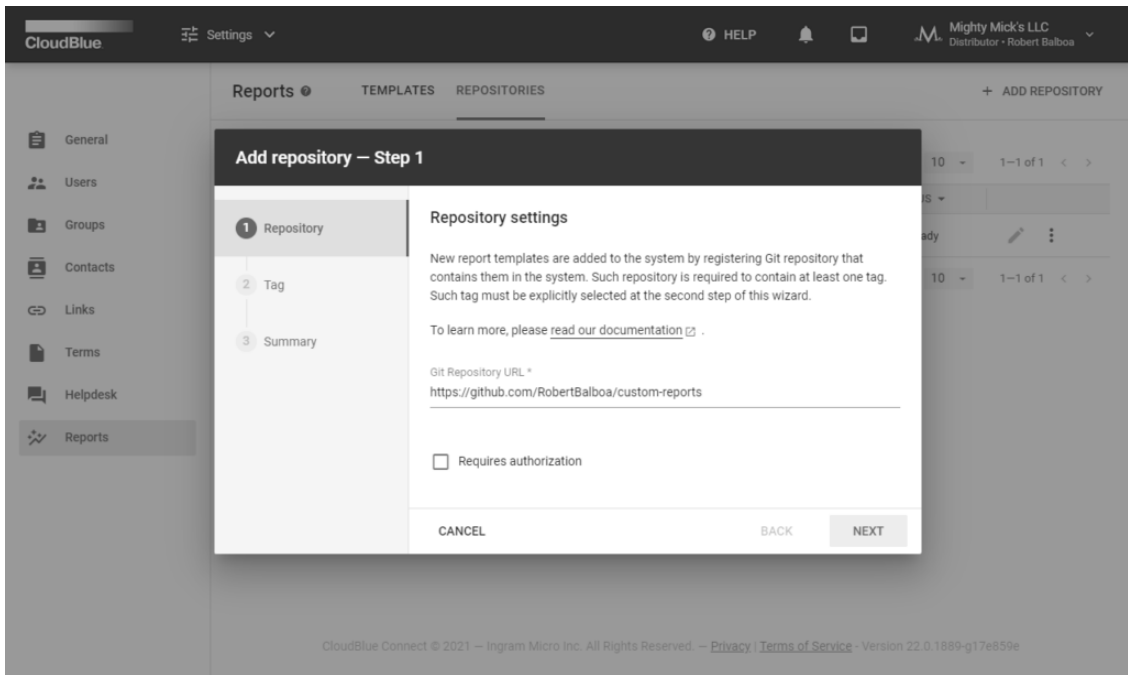

Click the **Add** button to launch a repository wizard. Thereafter, follow the wizard steps to successfully add your repository to the Connect platform.

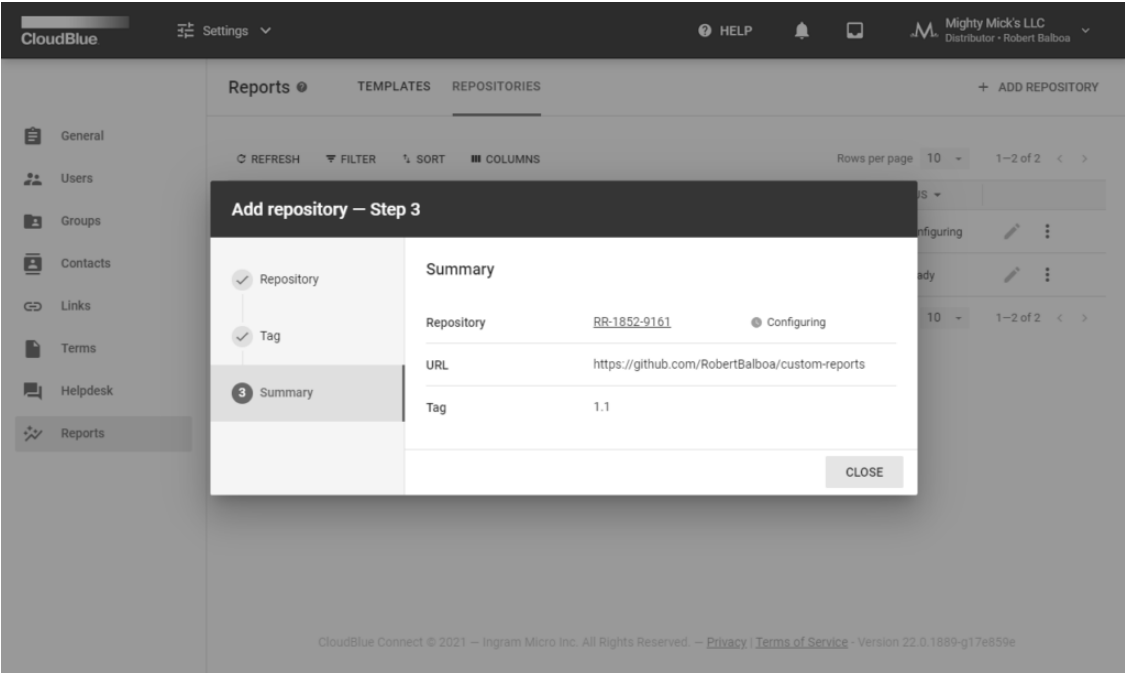

The screenshot shows the CloudBlue interface with the 'Reports' section selected. The 'REPOSITORIES' tab is active, and a '+ ADD REPOSITORY' button is highlighted with a red box. The interface includes a sidebar with navigation options like 'Account', 'Users', 'Groups', 'Contacts', 'Links', 'Terms', 'Helpdesk', and 'Reports'. The main content area displays a table of repositories with columns for 'REPOSITORY', 'TEMPLA...', 'STATS', 'UPDATED', and 'STATUS'. A single repository is listed with the name 'Connect Reports System' and a status of 'Ready'.

REPOSITORY	TEMPLA...	STATS	UPDATED	STATUS
Connect Reports System RR-8419-1585 - https://github.com/cloudblue/...	13	Month: 139 Total: 296	06/23/2021 6:00 PM	Ready

CloudBlue Connect © 2021 – Ingram Micro Inc. All Rights Reserved. – [Privacy](#) | [Terms of Service](#) - Version 22.0.1889-g17e859e

- Repository:** Provide your Git URL to the corresponding field. Note that your repository should contain at least one tag. In case your repository requires authorization, check the *Requires Authorization* checkbox and specify your username and password.
- Tag:** Select your required tag in the following form. Click the *Save* button to finalize your repository configuration on Connect.
- Summary:** As a result, the system provides a summary with your added repository data.

Note that the system also assigns the *Configuring* status to your new repository object. In case your repository is scanned successfully, Connect assigns the *Ready* status to this object. Otherwise, the operation is failed and the system transfers this object to the *Failed* state.

Repository Details

Click on your added repository name from the Repository tab to access the **Repository Details** screen:

Repository details

Name	Stats	Status	URL
Custom RR-1852-9161	Month: 0, Total: 0	Ready	https://github.com/Robert Balboa/custom-reports Tag: 22.11

Michael Goldmill

Repository is being scanned for report templates 4:17 AM

System

Repository configuration has finished successfully, following templates are available: Custom Report, Tutorial Report 4:17 AM

Repository details

Edit repository

Repository settings

New report templates are added to the system by registering Git repository that contains them in the system. Such repository is required to contain at least one tag. Such tag must be explicitly selected at the second step of this wizard.

To learn more, please [read our documentation](#).

The Repository Details screen displays your repository description within the **General** tab. Note that the system provides this description from your *readme.md* file.

Click the **Edit** button at the top-right corner of the screen to change your added repository URL, authorization credentials, or tags. In case your repository object is assigned to the *Failed* state, you can delete the repository by clicking on the vertical ellipsis icon and clicking delete.

Navigate to the **Templates** tab from the Repository Details screen to access your processed custom templates. The system allows managing your custom templates and allows accessing the *Template Details* screen as described below.

Templates

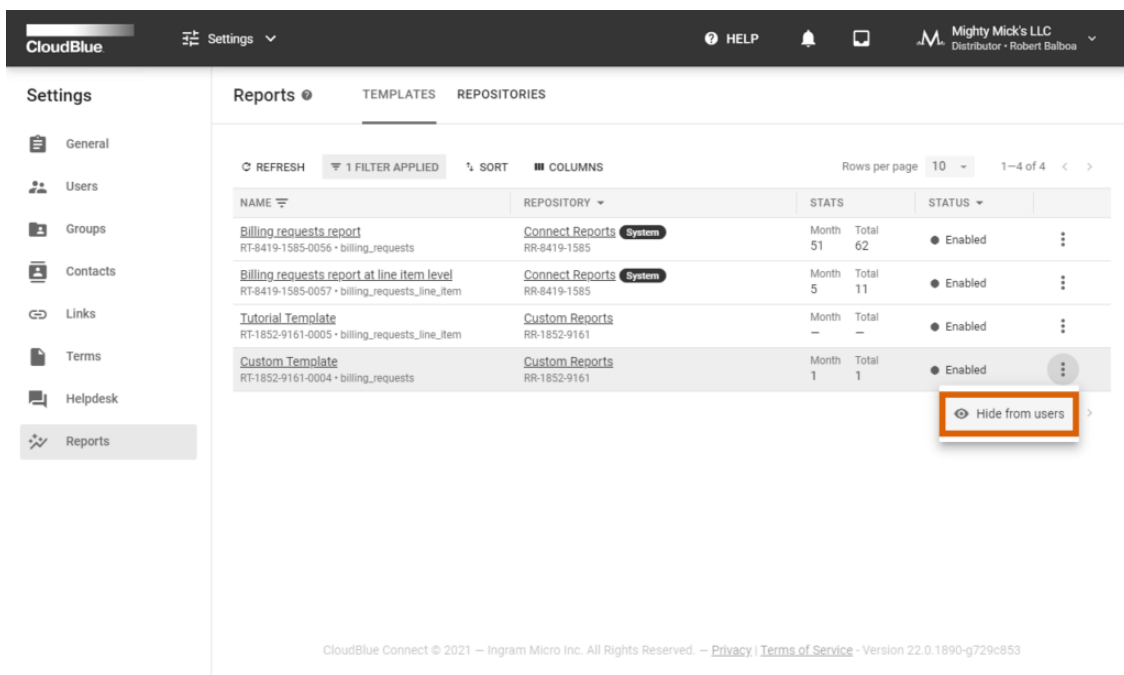

The **Templates** tab from the Reports section allows reviewing all *system* templates (templates that are available on Connect by default) as well as your custom templates that can be added from your Git repositories. Templates define the structure and the content of your generated report files.

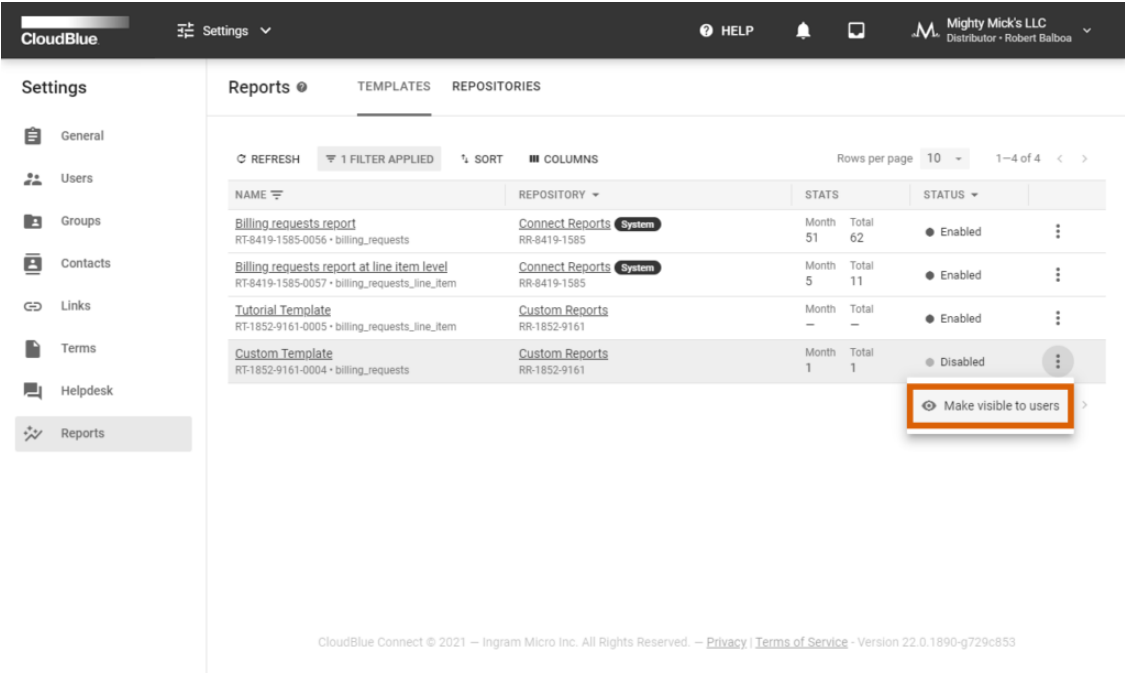

Note that the *Templates* tab also provides statistics that showcase the number of reports that generated using a template (for the last month and in total).

Template Management

Hide your added custom report files by clicking on the vertical ellipsis (⋮) icon and selecting the **Hide from users** option. In this case, the system transfers your template to the *Disabled* state and it will not be visible to your account users.

In case your updated repository doesn't include your added templates, the system assigns such templates to the *Blocked* state. Once your repository object is removed, the system automatically deletes its associated templates.

Note that it is not possible to disable or delete the default system templates.

Template Details

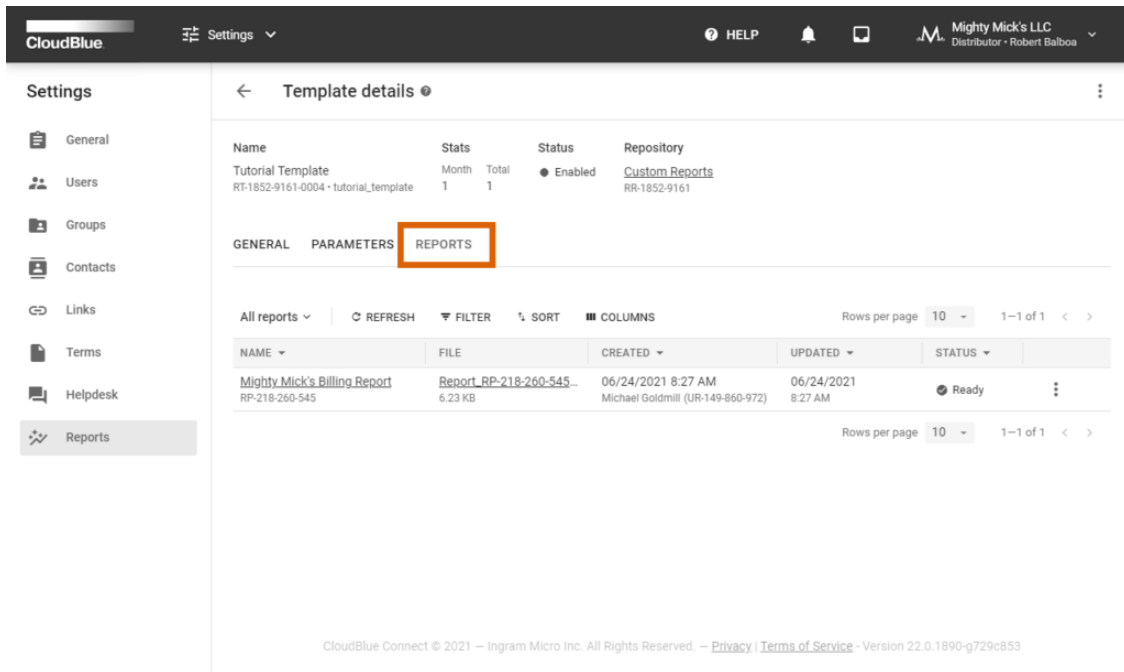

Click on the template name to access the **Template Details** screen. This screen provides various data within the following tabs:

- **General:** Contains the description of your selected report template.
- **Parameters:** This tab provides parameter data for your selected template. This includes *parameter name*, *type* and if a provided parameter *is required*.
- **Reports:** Use this tab to review and access reports that are generated by using the selected template.

The screenshot shows the 'Template details' page for a 'Tutorial Template'. The 'GENERAL' tab is selected and highlighted with an orange box. The page includes a sidebar with navigation options like General, Users, Groups, Contacts, Links, Terms, Helpdesk, and Reports. The main content area displays the template's name, stats (Month: 1, Total: 1), status (Enabled), and repository (Custom Reports). A description box contains the text: 'Tutorial Template. This template allows viewing all billing transactions generated for your specified time period.'

The screenshot shows the 'Template details' page for a 'Tutorial Template', with the 'PARAMETERS' tab selected and highlighted with an orange box. The page layout is similar to the first screenshot, but the main content area displays a table of parameters. The table has columns for NAME, TYPE, and REQUIRED.

NAME	TYPE	REQUIRED
Report period date	Date Range	✓
Product list product	Product	✓
Marketplaces mip	Marketplace	✓

The screenshot shows the 'Template details' page for a report template. The 'REPORTS' tab is selected and highlighted with a red box. Below the tabs, there is a table of report instances. The table has columns for NAME, FILE, CREATED, UPDATED, and STATUS. The first row shows a report named 'Mighty Mick's Billing Report' with a file named 'Report_RP-218-260-545...' and a status of 'Ready'.

NAME	FILE	CREATED	UPDATED	STATUS
Mighty Mick's Billing Report RP-218-260-545	Report_RP-218-260-545... 6.23 KB	06/24/2021 8:27 AM Michael Goldmill (UR-149-860-972)	06/24/2021 8:27 AM	Ready

Note that you can also click on the vertical ellipsis (⋮) to *disable* (hide) or *enable* your selected custom report template.
