IP Rules

This article has been generated from the online version of the documentation and might be out of date. Please, make sure to always refer to the online version of the documentation for the up-to-date information.

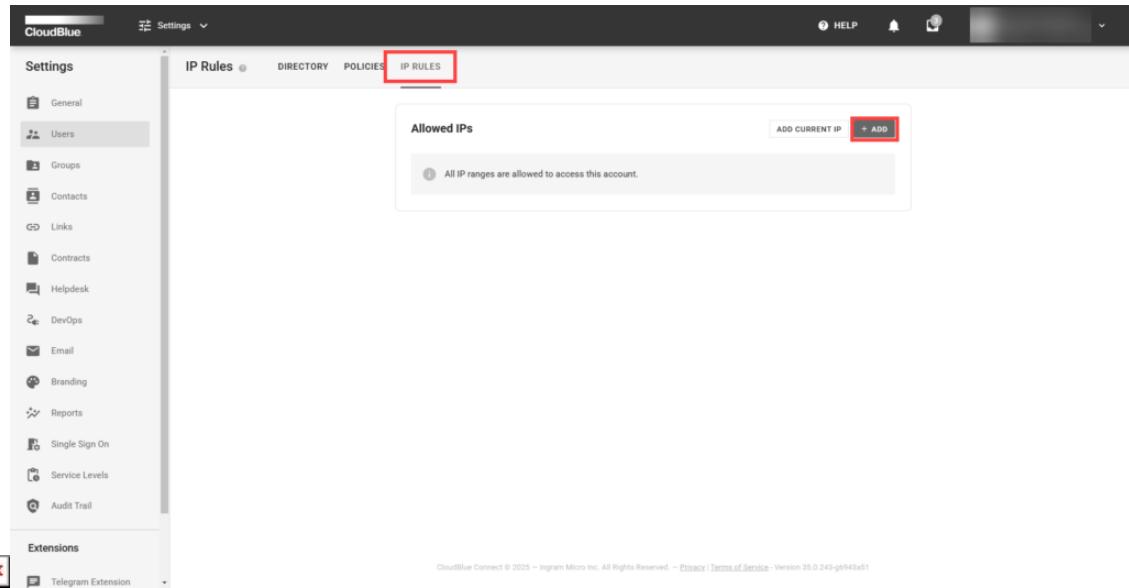

Auto-generated at February 15, 2026

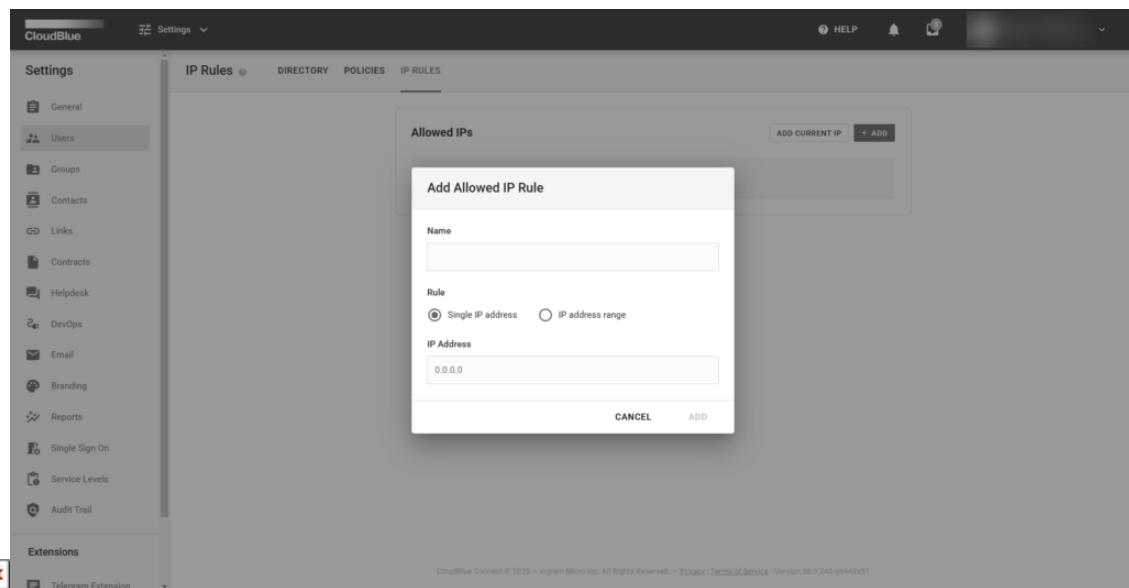

The **IP (Internet Protocol) Rules** functionality allows account owners within the platform to set up IP address rules that can be whitelisted to access the account. Whitelisted IP addresses can be, optionally, set up to enforce and extend certain company DNS security within the CloudBlue Connect platform.

Adding an Allowed IP Address

Access the **Users** menu and navigate to the IP Rules page. Once within the IP Rules page, click **Add** to launch the configuration screen.

The screenshot shows the CloudBlue Connect interface. The left sidebar is titled 'Settings' and includes options like General, Users (which is selected and highlighted in grey), Groups, Contacts, and various support and reporting modules. The main content area is titled 'IP Rules' and has tabs for DIRECTORY, POLICIES, and IP RULES (the latter is underlined and highlighted with a red box). Below these tabs is a section titled 'Allowed IPs' with a note: 'All IP ranges are allowed to access this account.' At the top right of this section is a button labeled 'ADD CURRENT IP' and a red-bordered button labeled '+ ADD' (also highlighted with a red box). The bottom right of the main content area shows the copyright notice: 'CloudBlue Connect © 2025 — Ingram Micro Inc. All Rights Reserved. — [Privacy](#) | [Terms of Service](#) — Version 30.0.243-qf943a51'.

The screenshot shows the 'Add Allowed IP Rule' dialog box. The dialog is titled 'Add Allowed IP Rule'. It contains a 'Name' input field (empty), a 'Rule' section with two radio buttons ('Single IP address' is selected, 'IP address range' is not), and an 'IP Address' input field containing '0.0.0.0'. At the bottom of the dialog are 'CANCEL' and 'ADD' buttons. The background of the main interface is dimmed, and the 'IP RULES' tab is highlighted in the top navigation bar.

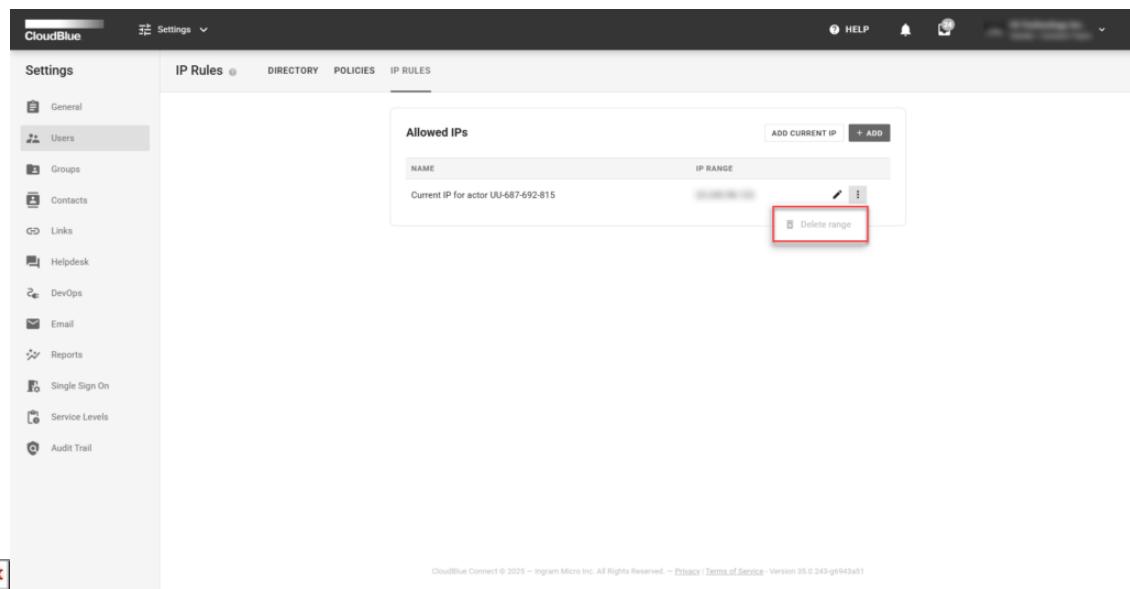

The following provides specifications for the allowed IP rule on the Connect platform and contains settings for the allowed IP:

- **Name:** Enter a name for this IP rule
- **Rule:** Please select between the following
 - Single IP address: If you want to set a specific IP address
 - IP address range: If you want to set a range of IP addresses
- **IP Address:** Enter the IP Address or IP Address Range that is enforced by this rule

Additional, users may use the **Add Current IP** button to immediately retrieve their current IP and add it as a IP rule within the account.

Removing an IP Address Rule

Locate an IP that you want to remove from your account and click the vertical ellipsis (⋮) icon on the corresponding row. Thereafter, click the **Delete range** button to remove this IP rule.

The screenshot shows the CloudBlue Connect interface. The left sidebar has 'Settings' selected, with 'IP Rules' highlighted. The main content area shows a table titled 'Allowed IPs' with one row: 'Current IP for actor UU687-692-815'. To the right of this row are edit and delete icons. A red box highlights the 'Delete range' button, which is a small square with a minus sign.

Caution

Please consult with your security team before implementing an IP rules, as misconfigured IP rules may have unintended consequences and lock out the wrong users from the account.
