Listings Interface

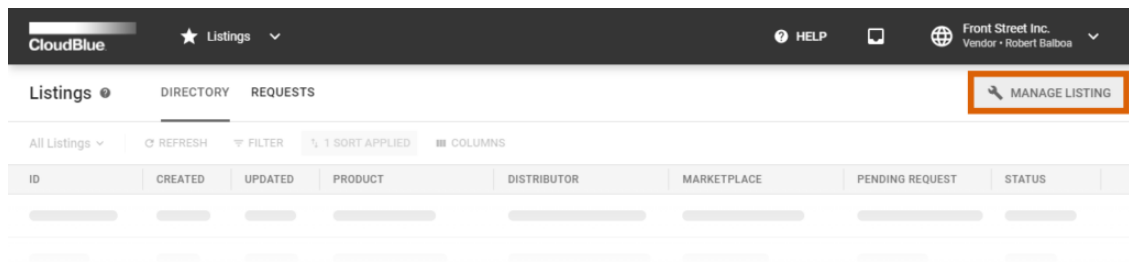

This article has been generated from the online version of the documentation and might be out of date. Please, make sure to always refer to the online version of the documentation for the up-to-date information.

Auto-generated at May 17, 2022

The following describes the graphical user interface and outlines all operations that are provided within the Listing module. Note that Vendors use this module to create listing requests and manage their generated listing objects, while Distributors and Resellers use this module to review provided listing information and accept or rejected listing requests.

Vendor Portal

Vendors can manage their product listings by accessing the **Listings** management module. Any listing-related operation starts from the *Manage Listing* action button located at the top-right corner of the screen:

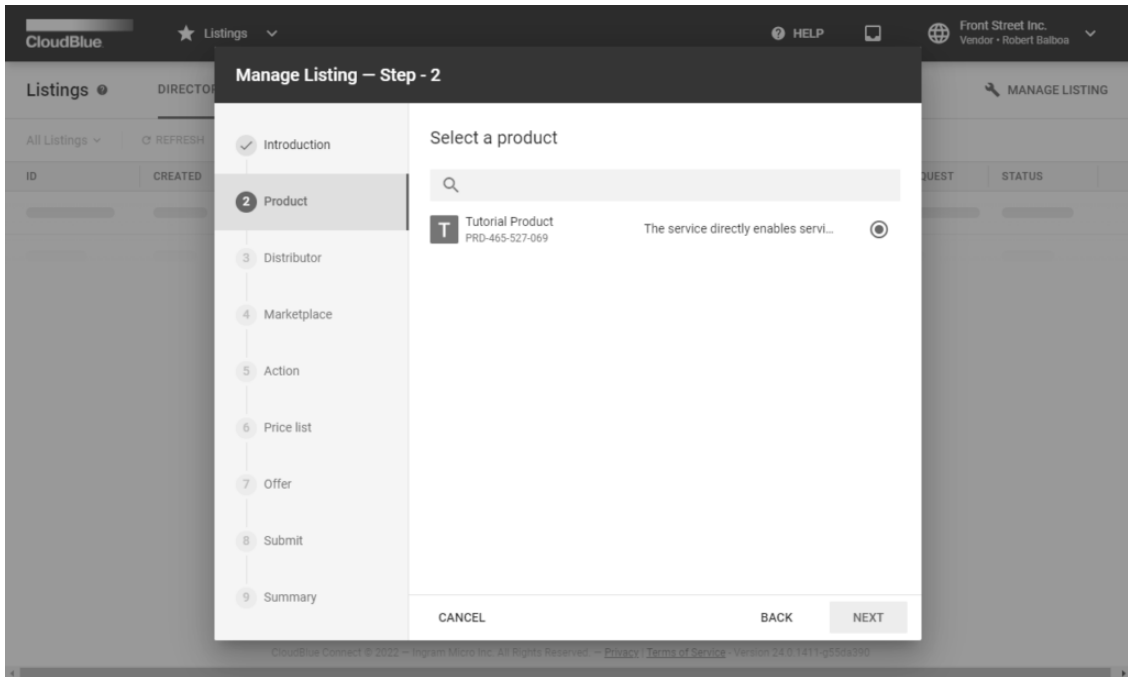

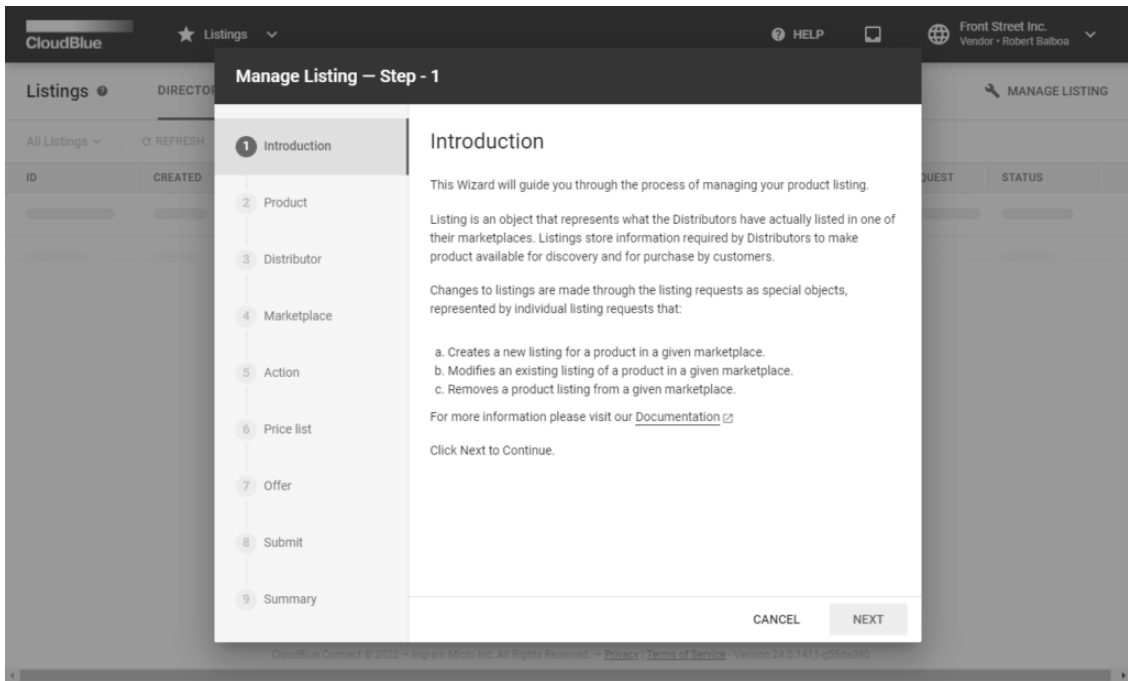

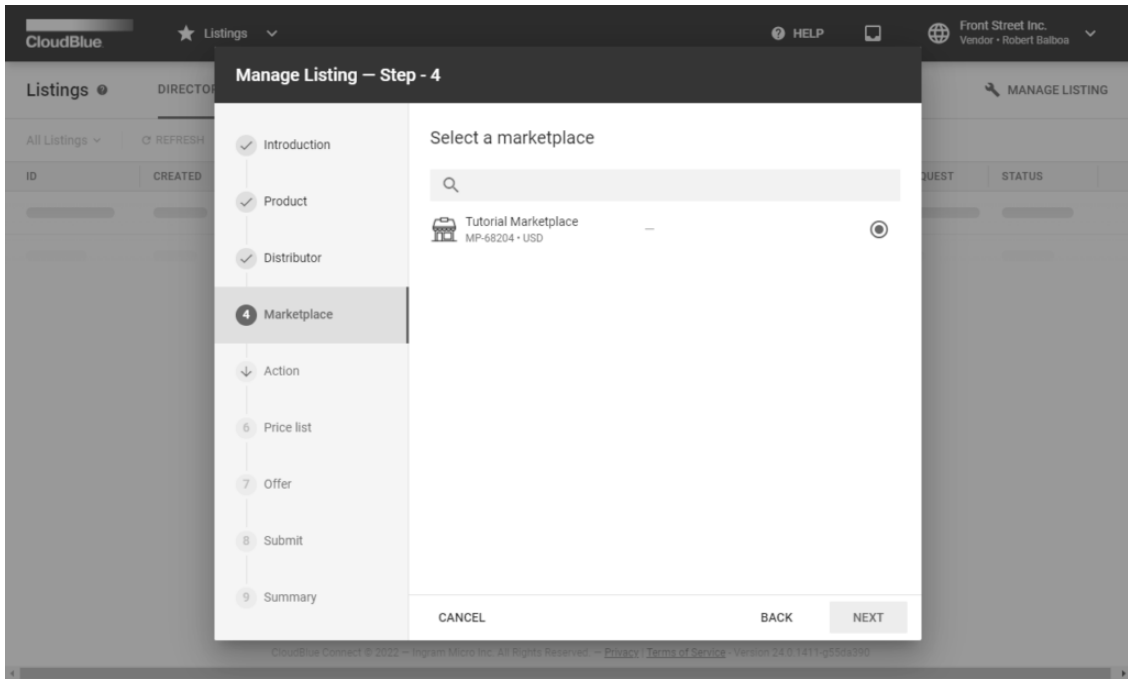

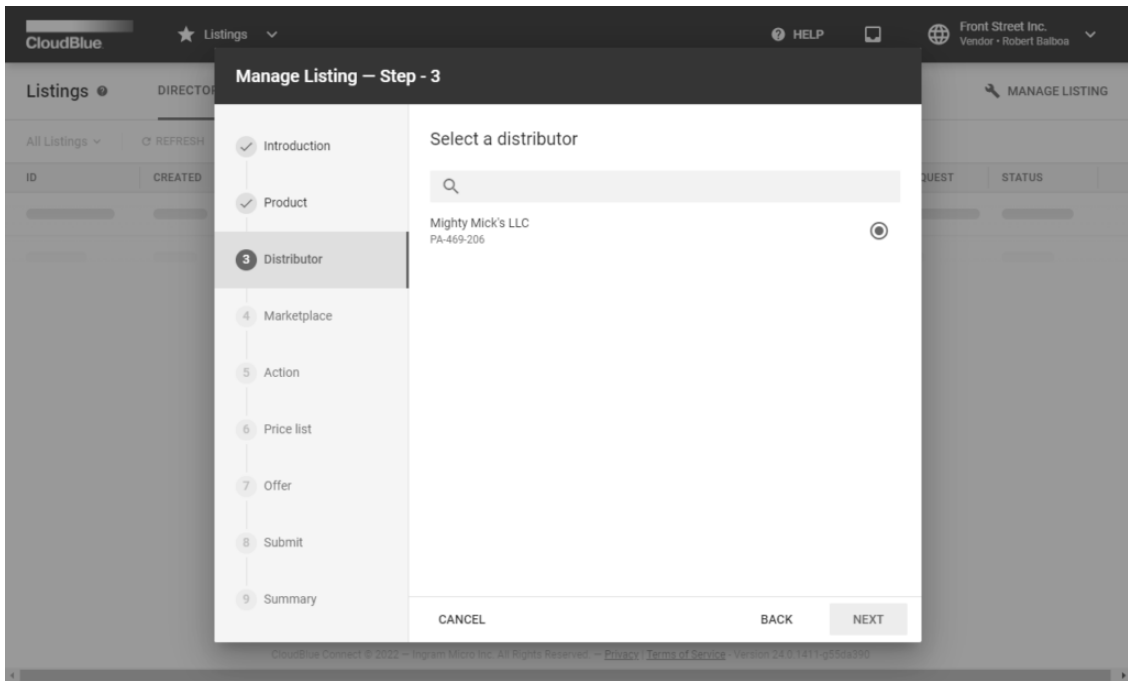

Thus, the system launches a multi-step wizard that guides users through the listing management process:

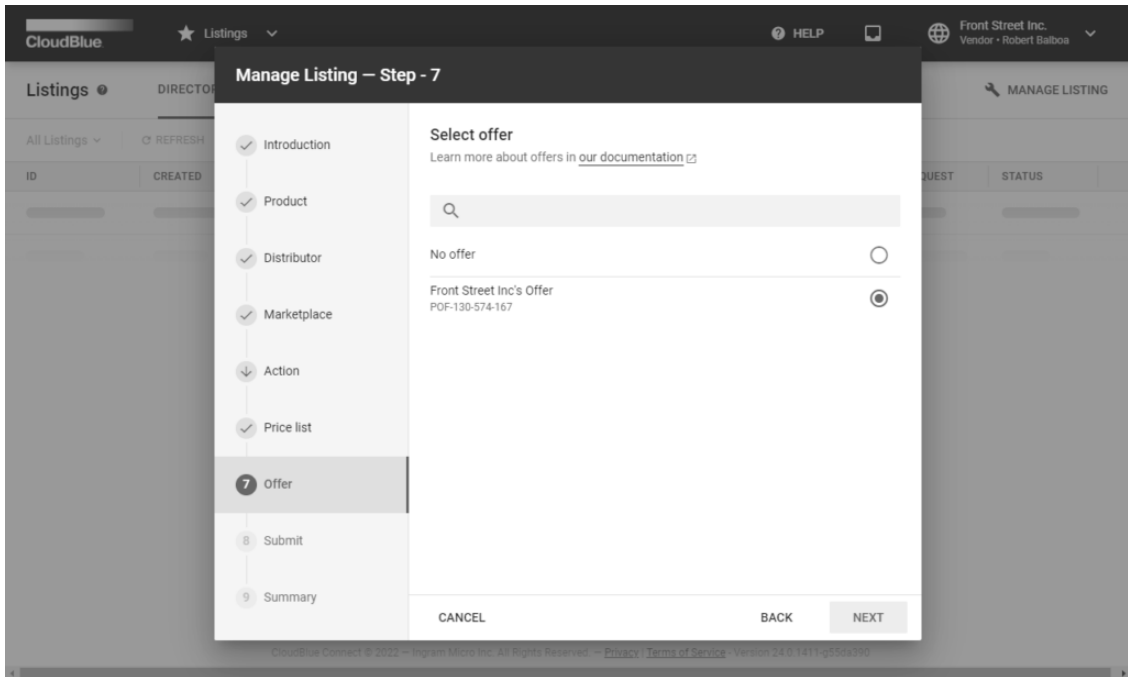

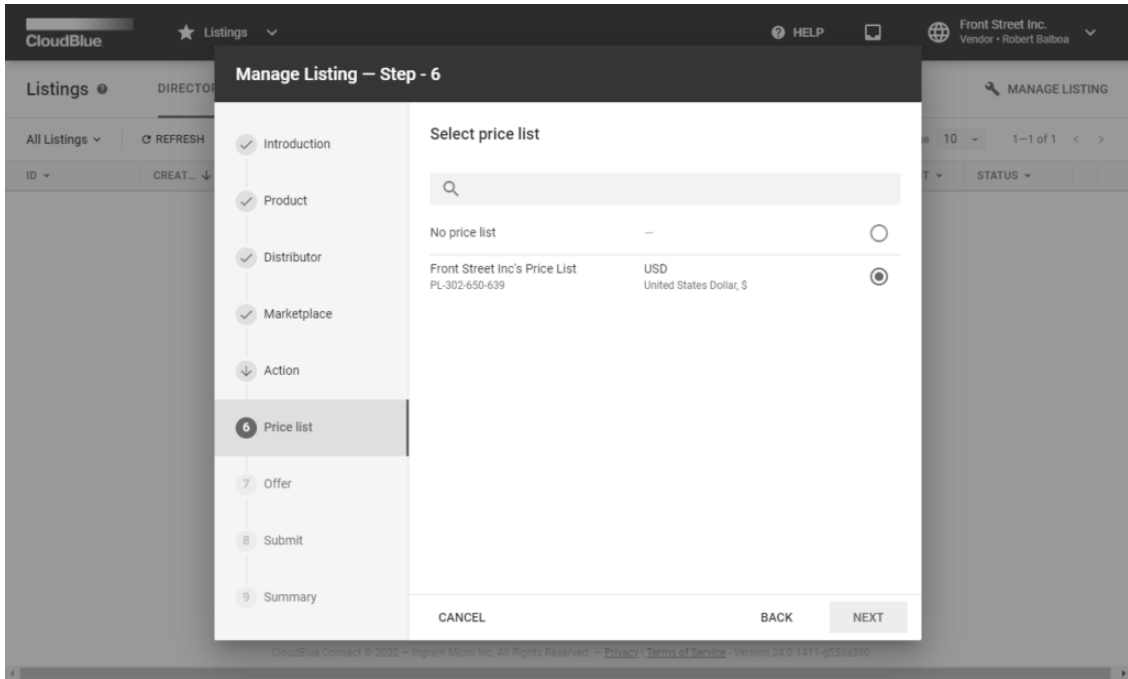

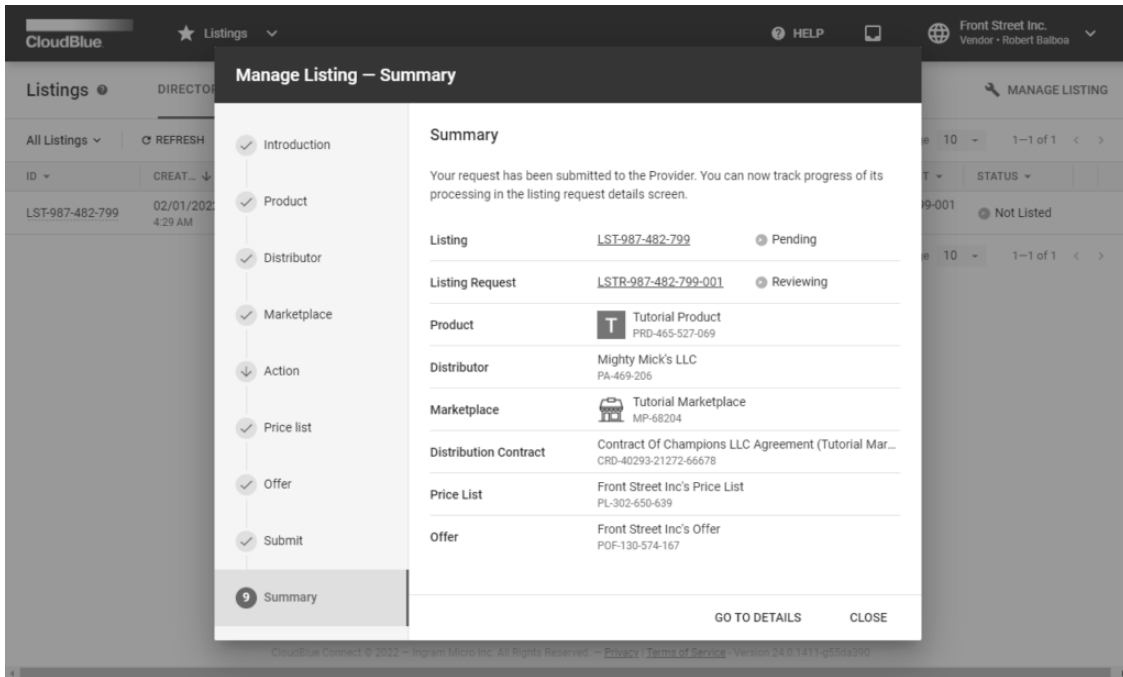

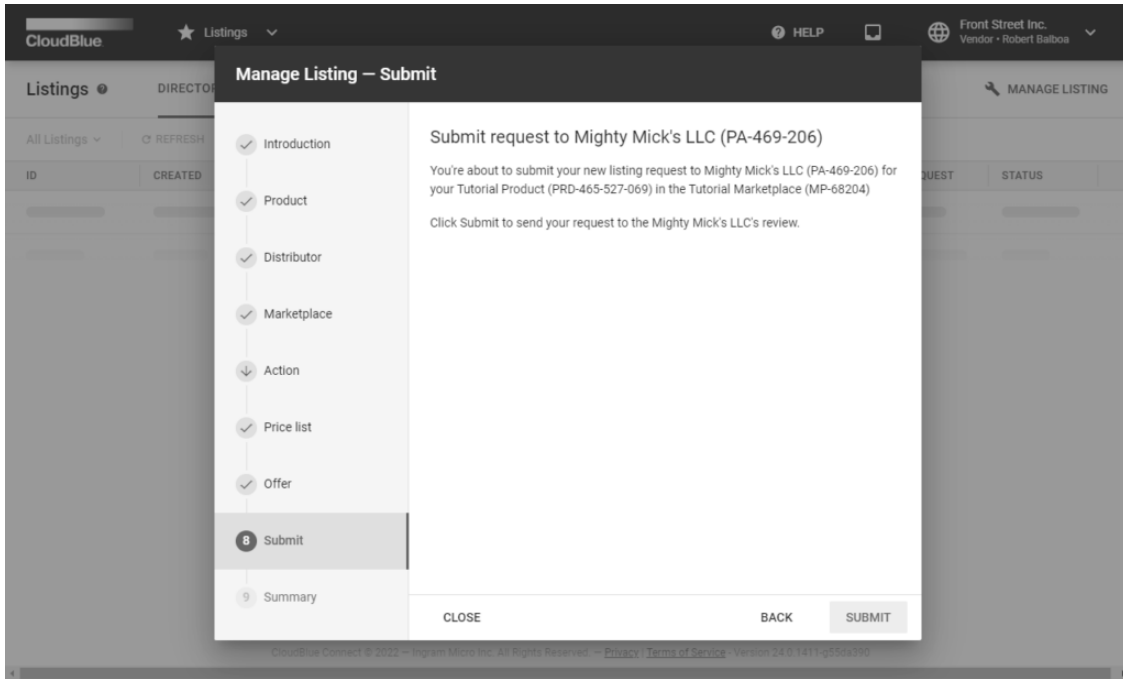

Prerequisites

Note that Vendors are required to have at least one active Distribution Contract and a defined Product on the CloudBlue Connect platform. Otherwise, the system will not launch the aforementioned wizard.

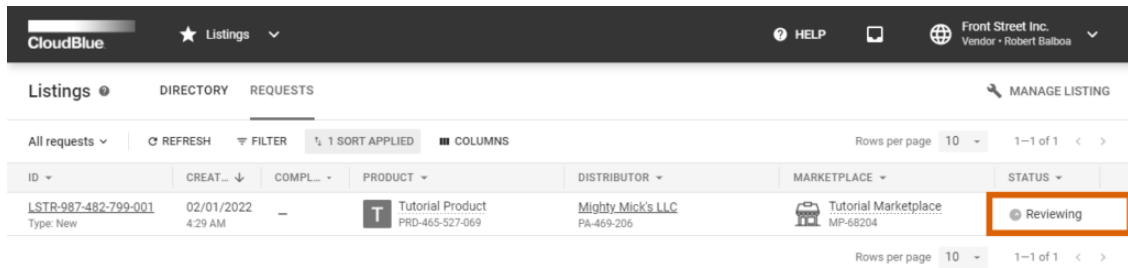

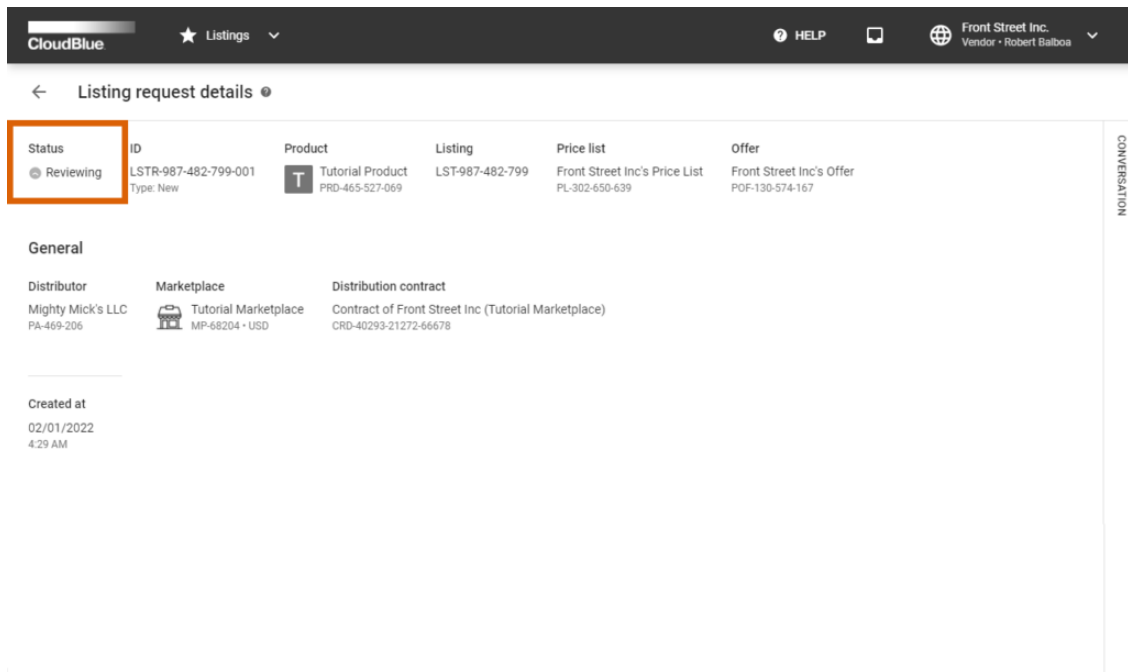

Depending on the current listing state and/or availability of contracts, different options will be available to Vendors. For example, if a listing object is already generated for your selected marketplace, the wizard prompts to update or terminate listing within the *Action* step. In case listing for the selected marketplace is not created, the wizard skips the *Action* step to generate a new listing object and a listing request.

CONVERSATION

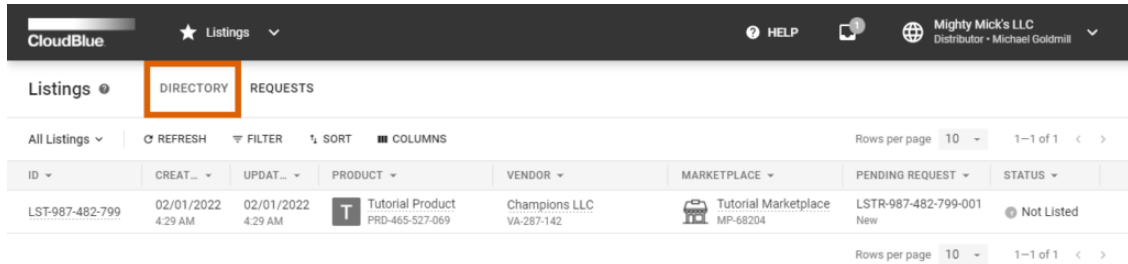

Once the wizard configuration is finalized, the system submits a listing request to your selected Distributor. Navigate to the *Requests* tab of the Listing module to access your listing requests.

Note that your new generated listing request is assigned to the **Reviewing** state. Therefore, no further actions are possible until the Distributor either accepts or rejects that listing request.

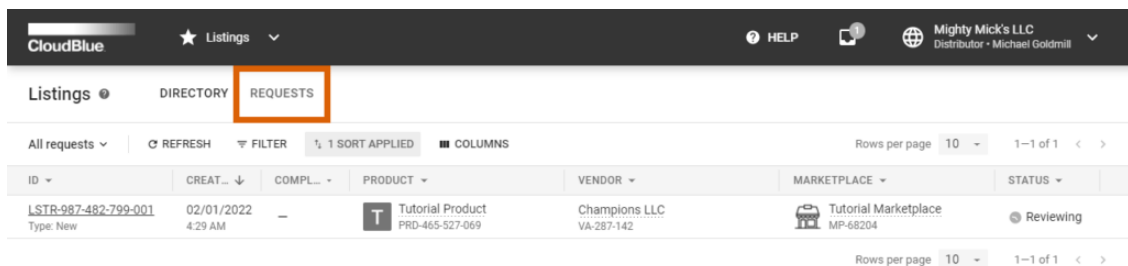

Distributor & Reseller Portals

In case a new listing and listing request are submitted successfully, the system notifies Distributors/ Resellers and provides listing and its requests under corresponding tabs within the **Listings** module.

Thus, the system allows reviewing the provided listing information and consequently accept or reject submitted requests:

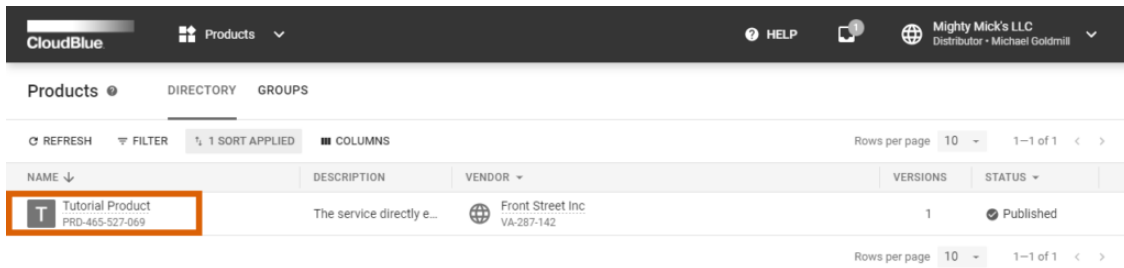

ID	CREAT...	UPDAT...	PRODUCT	VENDOR	MARKETPLACE	PENDING REQUEST	STATUS

ID	CREAT...	COMPL...	PRODUCT	VENDOR	MARKETPLACE	STATUS
LSTR-987-482-799-001 Type: New	02/01/2022 4:29 AM	—	Tutorial Product PRD-465-527-069	Champions LLC VA-287-142	Tutorial Marketplace MP-68204	Reviewing

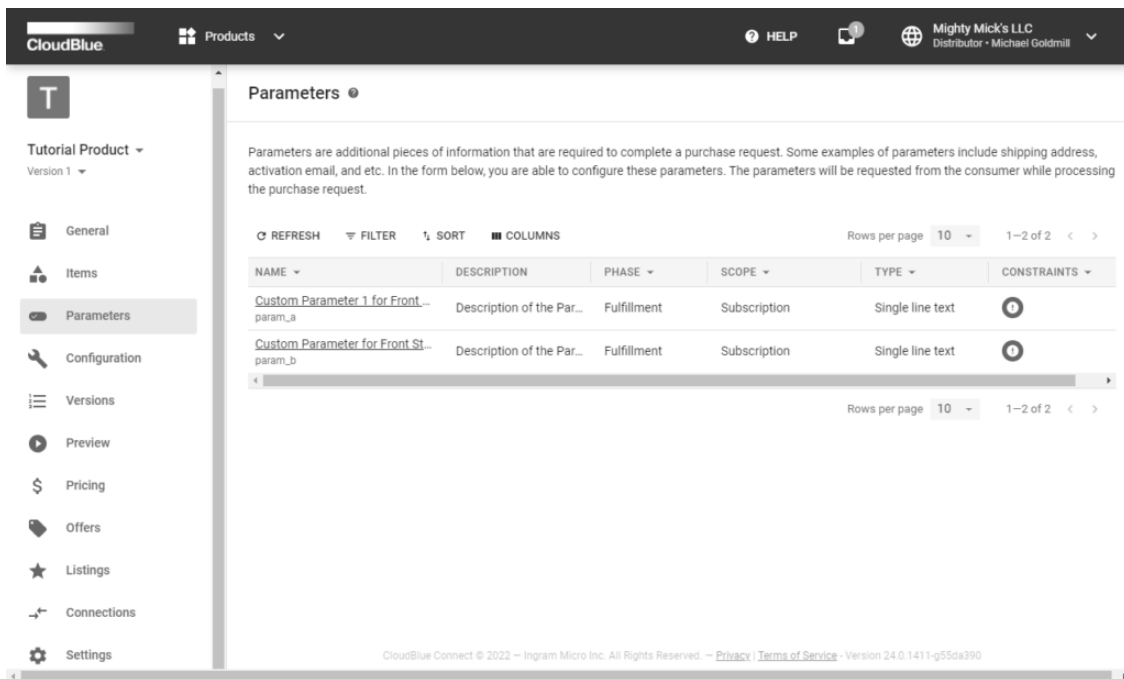

Once new listing objects are generated and submitted to Distributors or Resellers, the system also allows accessing and

reviewing associated products within the **Products** module.

The screenshot shows the CloudBlue interface for the 'Products' module. At the top, there is a navigation bar with 'CloudBlue', 'Products', 'HELP', and 'Mighty Mick's LLC Distributor - Michael Goldmill'. Below this, the 'Products' section is active, showing 'DIRECTORY' and 'GROUPS' tabs. A table lists products with columns for NAME, DESCRIPTION, VENDOR, VERSIONS, and STATUS. One product is highlighted with an orange box:

NAME	DESCRIPTION	VENDOR	VERSIONS	STATUS
Tutorial Product PRD-465-527-069	The service directly e...	Front Street Inc VA-287-142	1	Published

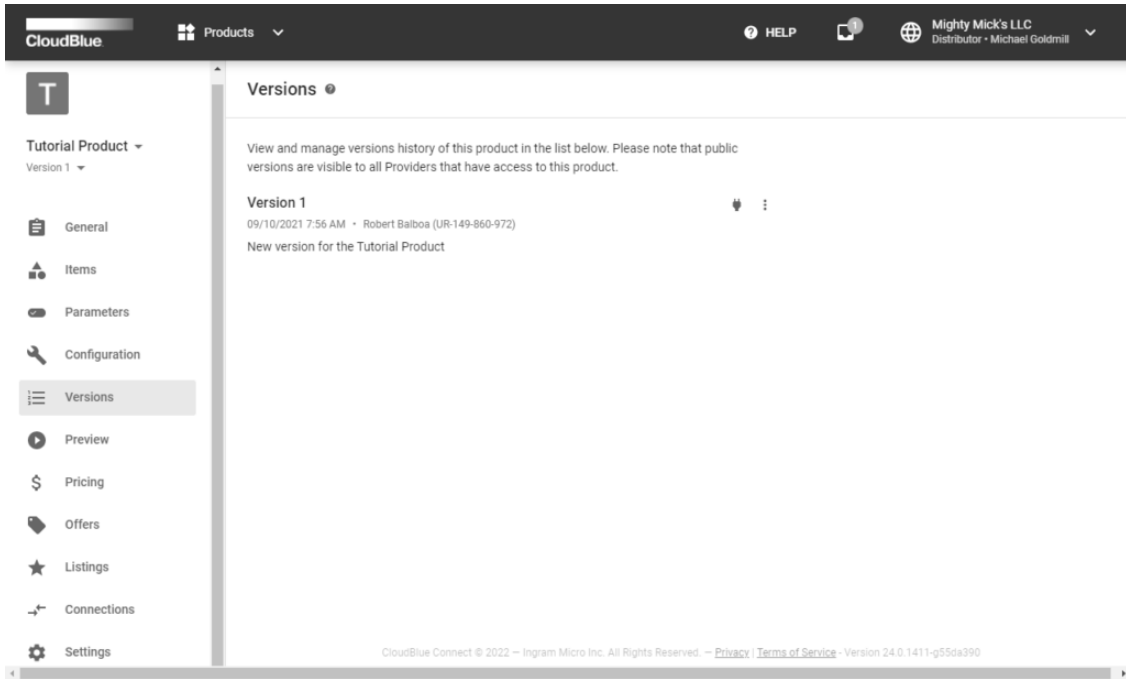

The screenshot shows the 'Parameters' configuration page for the 'Tutorial Product'. The left sidebar contains navigation options: General, Items, Parameters (selected), Configuration, Versions, Preview, Pricing, Offers, Listings, Connections, and Settings. The main content area is titled 'Parameters' and includes a description: 'Parameters are additional pieces of information that are required to complete a purchase request. Some examples of parameters include shipping address, activation email, and etc. In the form below, you are able to configure these parameters. The parameters will be requested from the consumer while processing the purchase request.'

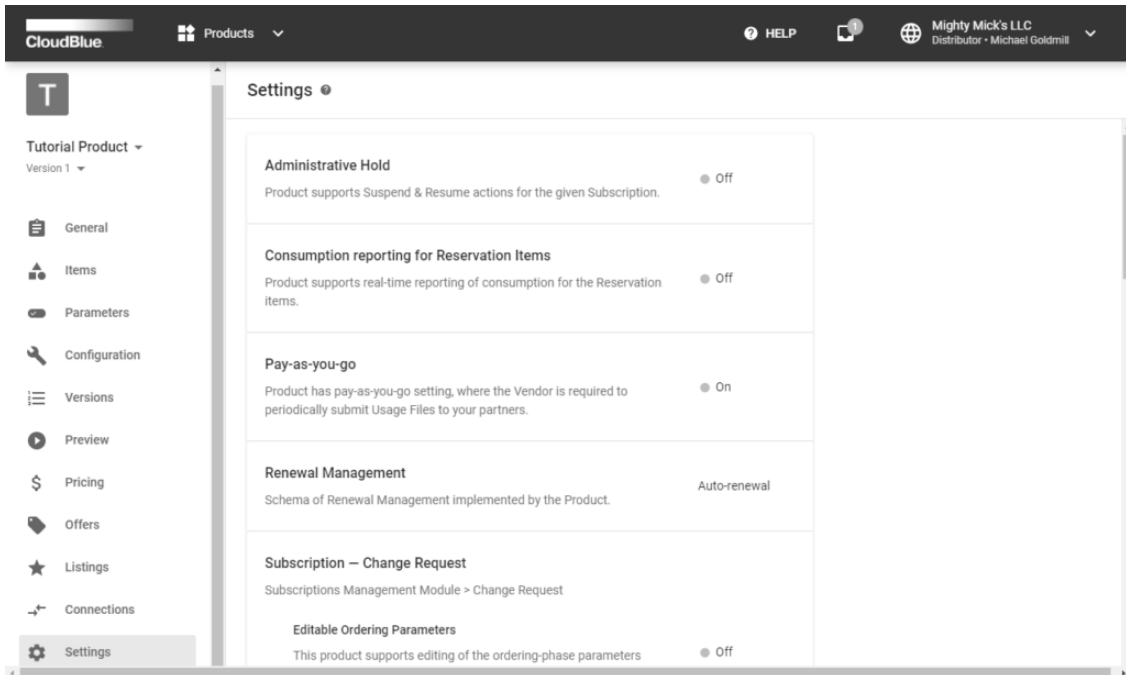

Below the description is a table listing parameters:

NAME	DESCRIPTION	PHASE	SCOPE	TYPE	CONSTRAINTS
Custom Parameter 1 for Front St... param_a	Description of the Par...	Fulfillment	Subscription	Single line text	0
Custom Parameter for Front St... param_b	Description of the Par...	Fulfillment	Subscription	Single line text	0

At the bottom of the page, there is a footer: 'CloudBlue Connect © 2022 - Ingram Micro Inc. All Rights Reserved. - Privacy | Terms of Service - Version 24.0.1411-g55da390'

The screenshot shows the 'Versions' page in the CloudBlue interface. The left sidebar contains a navigation menu with options: General, Items, Parameters, Configuration, Versions (selected), Preview, Pricing, Offers, Listings, Connections, and Settings. The main content area is titled 'Versions' and includes a sub-header 'Tutorial Product' with a 'Version 1' dropdown. Below this, there is a list of versions. The first entry is 'Version 1', dated '09/10/2021 7:56 AM', created by 'Robert Balboa (UR-149-960-972)'. The description for this version is 'New version for the Tutorial Product'. At the bottom of the page, there is a footer: 'CloudBlue Connect © 2022 – Ingram Micro Inc. All Rights Reserved. – [Privacy](#) | [Terms of Service](#) - Version 24.0.1411-g55da390'.

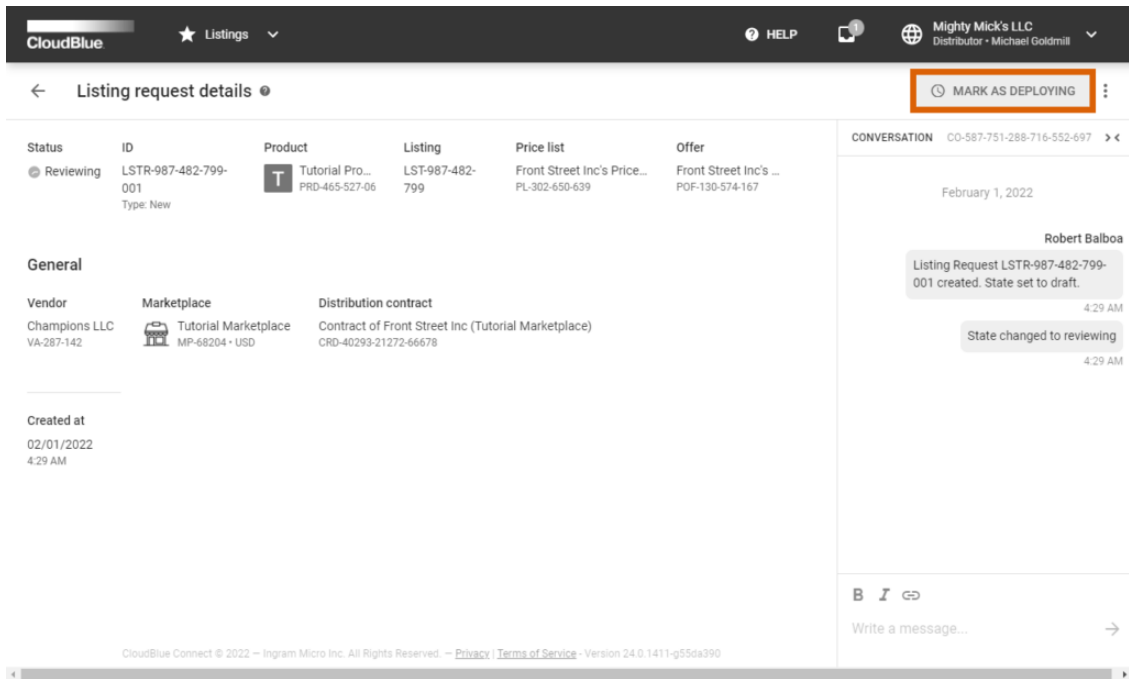

The screenshot shows the 'Settings' page in the CloudBlue interface. The left sidebar is identical to the previous screenshot, with 'Settings' selected. The main content area is titled 'Settings' and contains several configuration sections:

- Administrative Hold:** Product supports Suspend & Resume actions for the given Subscription. Off
- Consumption reporting for Reservation Items:** Product supports real-time reporting of consumption for the Reservation items. Off
- Pay-as-you-go:** Product has pay-as-you-go setting, where the Vendor is required to periodically submit Usage Files to your partners. On
- Renewal Management:** Schema of Renewal Management implemented by the Product. Auto-renewal
- Subscription – Change Request:** Subscriptions Management Module > Change Request
- Editable Ordering Parameters:** This product supports editing of the ordering-phase parameters. Off

Therefore, Distributors and Resellers can learn more and test provided products before processing the submitting listing requests.

In case Distributors/Resellers decide to accept a request, the system requires operators to access the listing request object via the **Requests** tab of the Listings module. Thereafter, it is necessary to mark the request as **Deploying** by using the

corresponding button on the interface and start deploying the provided marketplace to your marketplace.

Once all required product deployment operations are finalized, the system requires operators to click the **Mark as Completed** button and consequently accept the request.

In case Vendors should correct the provided data, Distributors and Resellers can reject the request by clicking on the vertical

ellipsis icon (⋮) and selecting the corresponding option. Thus, the system allows moving your listing request object to the *Cancelled* state in case this request is assigned to *Reviewing* or *Deploying* status. Refer to the State Machine documentation for more details.
