The following article provides REST API methods description for the Localization module on the CloudBlue Connect platform.

The screenshot shows the CloudBlue Connect Swagger interface. At the top, there is a navigation bar with a logo, a search bar, and several tabs: Documentation, Modules, Localization Management, and Localization API. Below the navigation bar, a section titled "Connect Swagger" is displayed. This section includes a "Specs URL" field containing the URL <https://apispec.connect.cloudblue.com/connect-openapi30.yml>. Below this, there are several filter buttons for "Version", "Download", "Open", "Description", and "Tags", each with a "x" icon. Further down, there is a "Playground" section with a "Disabled" status indicator and a "Models" section showing a "Hidden" status with a "x" icon. At the bottom, there is a "Path prefixes:" section with a green button containing the text "/localization*".
