# Product to Hub Connections

This article has been generated from the online version of the documentation and might be out of date. Please, make sure to always refer to the online version of the documentation for the up-to-date information.

Auto-generated at April 16, 2024

**Connection** is an entity that links a Vendor's product to a hub with the purpose of deploying this product on the corresponding commerce system and enabling its provisioning and fulfillment functions.

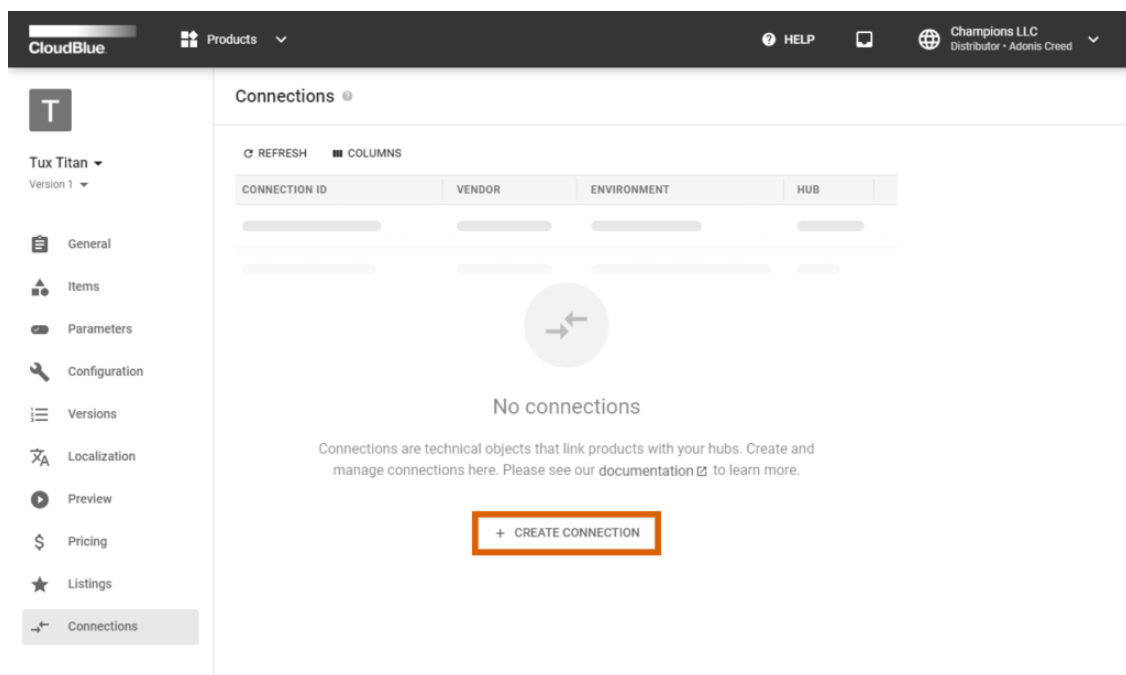

## Prerequisites

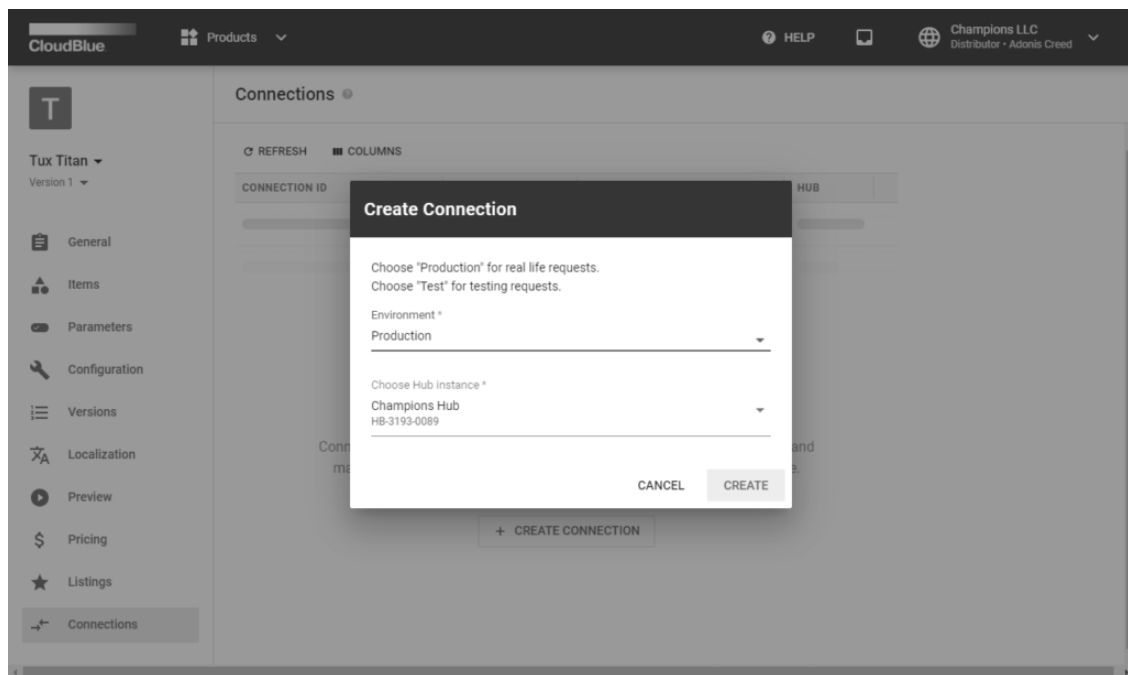

In order to be able to create a product connection, the following pre-conditions must be satisfied:

- A least one commerce system hub should be registered via the Hubs section of the Marketplace module;
- A signed distribution contract with a product vendor;
- Vendor should have a published Version of a product.
- There should be a Listing request for a vendor's product;
- The listing request should be sent to the Distributors for a review .

## Connection Creation

It is important to note that your created connection objects **cannot** be removed and its properties **cannot** be modified. Follow the steps below to successfully create a connection object on the CloudBlue Connect platform:

1. Navigate to the **Products** module.
2. Click on the product name that you want to create a connection for.
3. Switch to the **Connections** section via the left menu panel.
4. Click the **Create Connection** button.
5. Input the required connection parameters as follows:
  - **Environment** – can be either **Test** or **Production**. This determines what kind of fulfillment requests will be created under this connection;
  - **Choose Hub instance** – provides a list of hubs owned by the Distributors. to deploy the product to.

#### Note

The system allows creating one connection for one hub, either *Test* or *Production*. Changing your selection at a later stage is **not possible**.

6. Click the **Create** button to complete the connection creation process.

As a result, your configured connection object should be displayed within the **Connections** list.

## Connections List

Once at least one connection is created, the Connection section displays a list of your created connection objects:

The screenshot shows the CloudBlue interface for managing connections. The sidebar on the left contains navigation links: Tux Titan (Version 1), General, Items, Parameters, Configuration, Versions, Localization, Preview, Pricing, Listings, and Connections. The main content area is titled 'Connections' and includes a 'CREATE CONNECTION' button. Below the title, there is explanatory text and a note. A table lists the connections with columns: CONNECTION ID, VENDOR, ENVIRONMENT, and HUB. The table contains one entry: CT-5965-2407, Front Street Inc VA-287-142, Production, and Champions Hub HB-3193-0089. Pagination controls show 10 rows per page and 1-1 of 1.

CONNECTION ID	VENDOR	ENVIRONMENT	HUB
CT-5965-2407	Front Street Inc VA-287-142	Production	Champions Hub HB-3193-0089

The numbered points functions as below:

- [A]: The **Create Connection** button allows creating additional connections for the same product.
- [B]: The **Connection ID** column shows the Connect IDs of created connections. Click on this ID to access the **Connection details** screen.
- [C]: The **Vendor** column shows the account name and ID of the vendor who created and listed the product.
- [D]: The **Environment** column shows the environment type (*Test* or *Production*) configured during connection creation.
- [E]: The **Hub** column shows the name and ID of the hub to which the product is to be deployed.

## Connection Details Screen

The **Connection Details** screen can be accessed by clicking on a Connection ID from the Connection section. This screen provides multiple tabs that provides various information:
