Marketplaces Interface

This article has been generated from the online version of the documentation and might be out of date. Please, make sure to always refer to the online version of the documentation for the up-to-date information.

Auto-generated at September 16, 2025

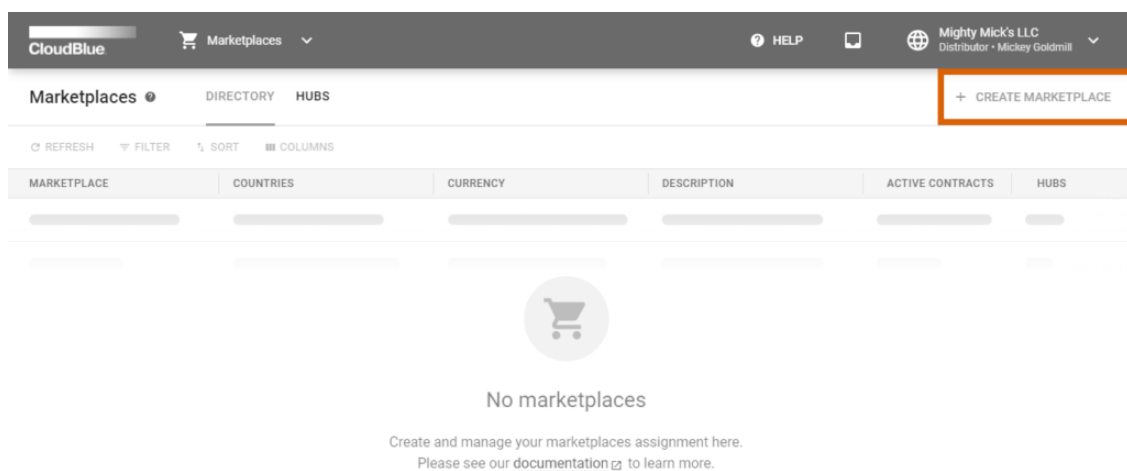

The following showcases how to successfully register a new marketplace and perform other operations with marketplaces on the CloudBlue Connect platform. It is also recommended to familiarize yourself with the Marketplace Overview first.

Marketplace Creation

Proceed to the **Marketplace** module to access a list of your marketplaces. In general, marketplace object can be added automatically via the Marketplace API. However, the system also allows creating a new marketplace manually by using a wizard.

Click the **Create Marketplace** button from the *Marketplaces* tab to launch the aforementioned wizard.

Thereafter, the wizard helps to define your marketplace, select associated countries, choose currencies, locales, map required hubs, select price attributes and so on. Once your marketplace is created, it will be available within the **Directory** tab.

In case step-by-step instructions on your marketplace creation are required, please refer to the Distributor Tutorial documentation.

Marketplace Details

Click on your marketplace name from the provided list to access the **Marketplace Details** screen:

The screenshot displays the 'Marketplace Details' page for 'Best Market' in the CloudBlue interface. The page is divided into several sections, each with an 'EDIT' button:

- General:** Includes fields for Name (Best Market), ID (MP-43344), Contracts (12), Description (META), Created (11/30/2021 1:28 AM), and Updated (11/30/2021 1:28 AM).
- Hub:** Includes fields for HUB NAME (PKHODOS ServicePro) and TIER ACCOUNT EXTERNAL ID (10000015).
- Price List Attributes:** Includes a table with columns NAME and DESCRIPTION. The table contains one row: Suggested TO Price (Vendor's (manufacturer's) suggested Retail Customer (Tier-0) price, also known as MSRP).
- Settings:** Includes fields for Countries (Saudi Arabia), Locales (—), Currency (USD - United States Dollar, \$), Listing Automation (—), and Referral Products (Off).

This screen displays various information on your selected marketplace. Namely, you can access its update or creation date, its ID, and the number of associated contracts.

Note that Marketplace Details can be used to review *general* marketplace information (e.g., name and icon), provided *settings* (e.g., selected countries, locales, currency, and listing automation for referral products), associated *hubs*, and selected price list *attributes*. Edit the aforementioned parameters by clicking the **Edit** button.

It is also possible to remove your marketplace by clicking on the (:) icon and selecting the *Delete* option. Note, however, that the system doesn't allow deleting marketplaces with assigned active agreements.
