# APS Locales

This article has been generated from the online version of the documentation and might be out of date. Please, make sure to always refer to the online version of the documentation for the up-to-date information.

Auto-generated at January 7, 2026

## Introduction

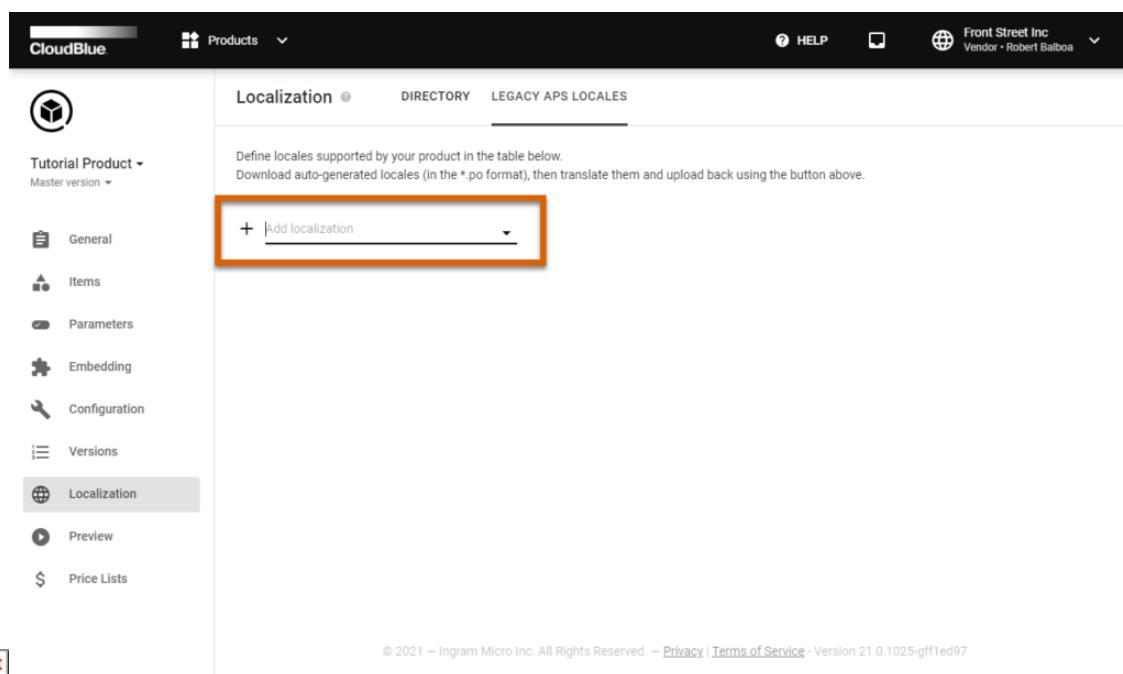

The **APS Locales** tab within the Localization section represents a legacy version of the localization functionality on CloudBlue Connect. Namely, it enables Vendors to provide a translation for the product ordering process. Specified localizations are used when presenting a product on international marketplaces.

The localization file that is generated via this tab includes text forms for automated messages and notifications related to product ordering operations. Note that the configured *localizable attributes* are applicable only to your provided localization.

The following guidelines showcase how to acquire a translation template via this tab and how to upload your provided localization file.

### 1. Add a supported localization

Click on the **Add Localization** field from the **Localization** section to select a language.

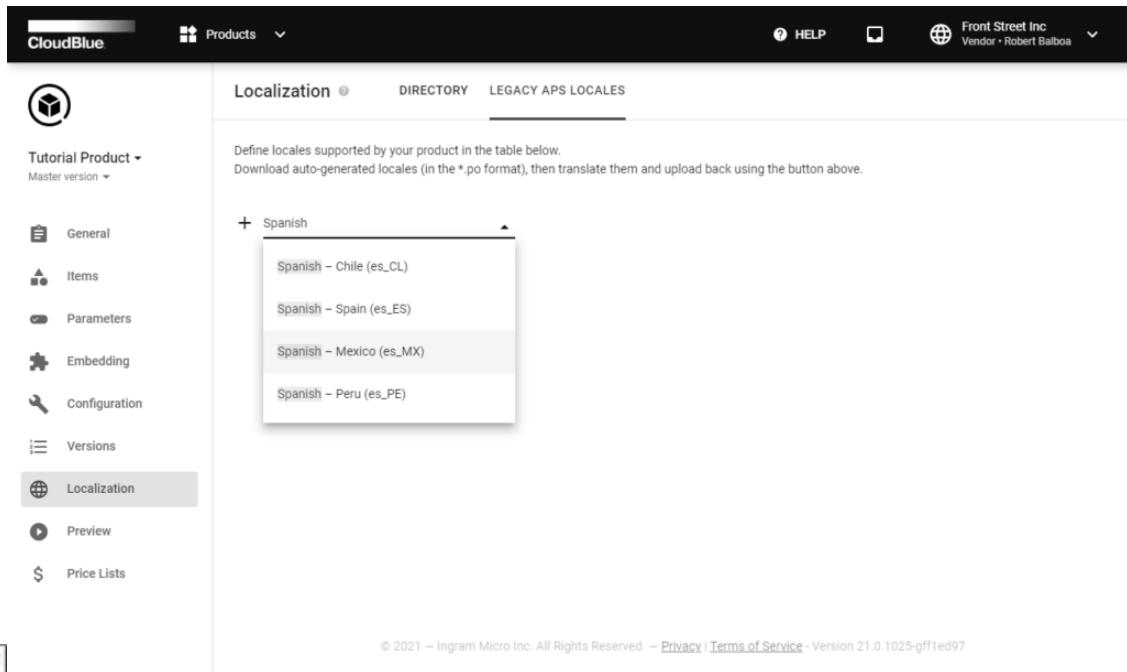

The screenshot shows the CloudBlue Connect interface with the 'Localization' tab selected. On the left, a sidebar lists various product components: General, Items, Parameters, Embedding, Configuration, Versions, Localization (which is highlighted in grey), Preview, and Price Lists. The main content area is titled 'Localization' and contains a sub-section 'LEGACY APS LOCALES'. It includes instructions for defining supported locales and downloading auto-generated localization files. A search bar with the placeholder 'Add localization' is highlighted with an orange box. The top navigation bar shows 'CloudBlue', 'Products', 'HELP', and the user's company 'Front Street Inc'.

#### Advice

Enter your required language name, its code or region to narrow down the list.

Click on your selected language from the list.

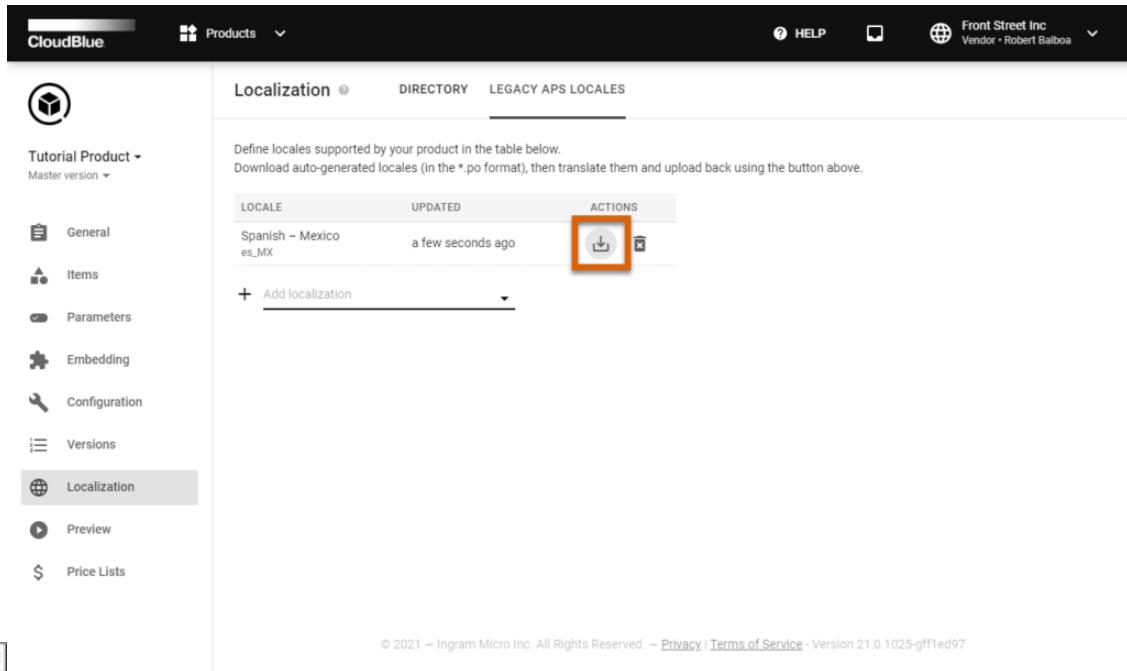

The screenshot shows the CloudBlue Localization interface. On the left, a sidebar menu includes options like General, Items, Parameters, Embedding, Configuration, Versions, Localization (which is selected and highlighted in grey), Preview, and Price Lists. The main content area is titled "Localization" and shows a dropdown menu for "Spanish" locales. The menu lists four options: "Spanish – Chile (es\_CL)", "Spanish – Spain (es\_ES)", "Spanish – Mexico (es\_MX)", and "Spanish – Peru (es\_PE)". The "Spanish – Mexico (es\_MX)" option is currently selected and highlighted in grey. At the bottom of the main area, there is a copyright notice: "© 2021 – Ingram Micro Inc. All Rights Reserved. – [Privacy](#) | [Terms of Service](#) - Version 21.0.1025-gff1ed97".

As a result, the system will display your created locale on a list.

## 2. Download a template file

Click on the **download** icon next to your specified locale to acquire a localization template file.

The screenshot shows the CloudBlue Localization interface. The sidebar menu is identical to the previous screenshot. The main content area is titled "Localization" and displays a table of locales. The table has columns for "LOCALE", "UPDATED", and "ACTIONS". A single row is shown: "Spanish – Mexico es\_MX" with the "UPDATED" timestamp "a few seconds ago". In the "ACTIONS" column for this row, there is a download icon (a downward arrow inside a box) and a delete icon (a trash can). The download icon is highlighted with a red box. At the bottom of the main area, there is a copyright notice: "© 2021 – Ingram Micro Inc. All Rights Reserved. – [Privacy](#) | [Terms of Service](#) - Version 21.0.1025-gff1ed97".

### 3. Provide required translations

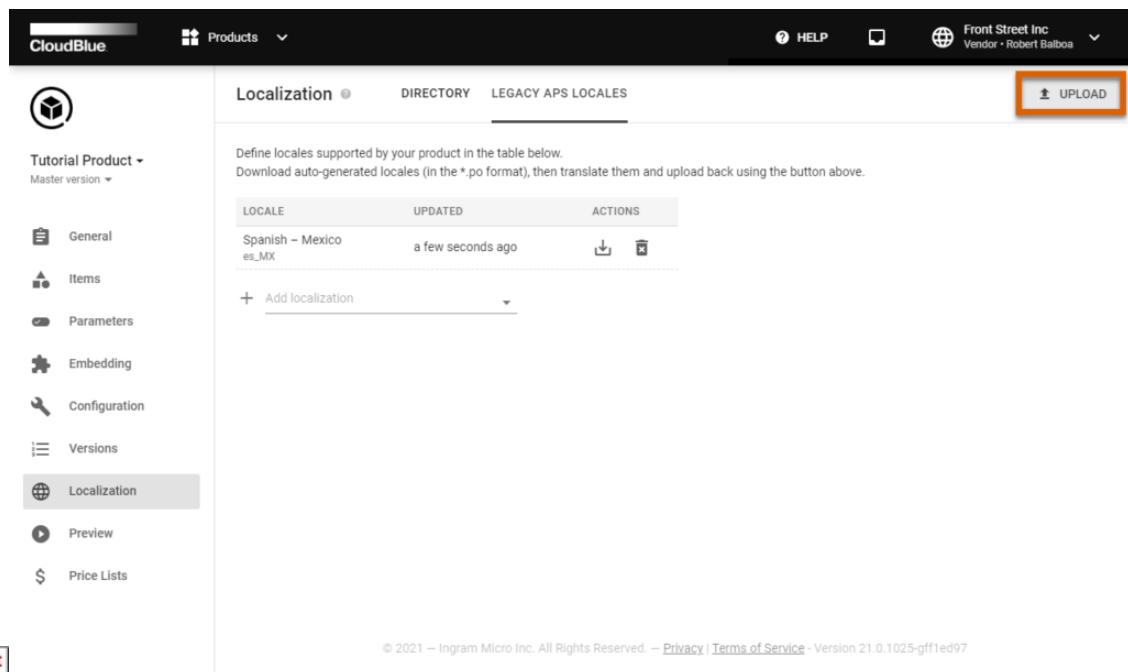

#### Information

Connect provides localization template files in the PO format. Use PO file editors (such as poedit.net) to open and edit these files.

Provide required translations via a PO file editor. Save your translated file in the PO format.

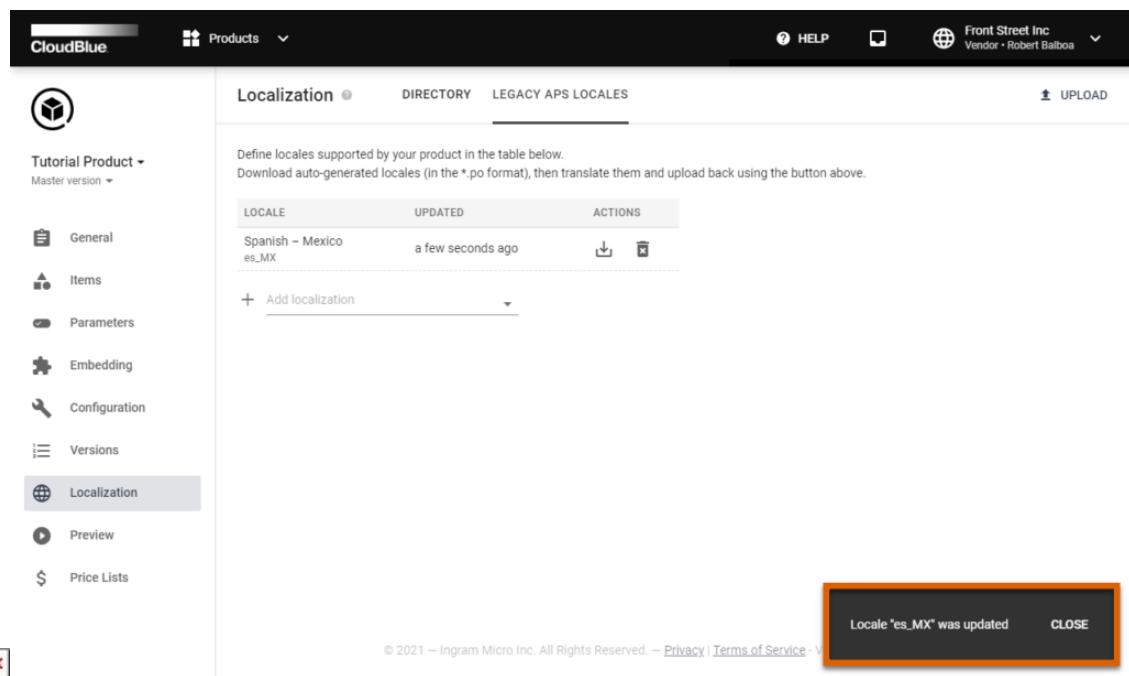

### 4. Upload your localization file

Click the **Upload** button to upload your file with provided translations.

The screenshot shows the CloudBlue Localization interface. The top navigation bar includes 'CloudBlue', 'Products', 'HELP', and 'Front Street Inc Vendor · Robert Balboa'. The left sidebar has a 'Tutorial Product' section and links for 'General', 'Items', 'Parameters', 'Embedding', 'Configuration', 'Versions', 'Localization' (which is selected and highlighted in grey), 'Preview', and 'Price Lists'. The main content area is titled 'Localization' with tabs for 'DIRECTORY' and 'LEGACY APS LOCALES'. It displays a table with one row: 'Spanish - Mexico' (es\_MX), updated 'a few seconds ago', with download and delete actions. Below the table is a button '+ Add localization'. The 'UPLOAD' button in the top right is highlighted with a red box. At the bottom, a footer note reads: '© 2021 – Ingram Micro Inc. All Rights Reserved. – [Privacy](#) | [Terms of Service](#) - Version 21.0.1025-gff1ed97'.

Once a localization file is successfully uploaded, the system displays the following locale update message.

The screenshot shows the CloudBlue Commerce platform interface. On the left, a sidebar lists product management options: General, Items, Parameters, Embedding, Configuration, Versions, Localization (which is selected and highlighted in grey), Preview, and Price Lists. The main content area is titled "Localization" and shows a table of supported locales. The table has columns for "LOCALE", "UPDATED", and "ACTIONS". One entry is listed: "Spanish ~ Mexico es\_MX" was updated "a few seconds ago". The "ACTIONS" column for this entry includes a download icon and a delete icon. Below the table, there is a button labeled "+ Add localization". At the top of the main content area, there are tabs for "LOCALIZATION", "DIRECTORY", and "LEGACY APS LOCALES". On the right, there is a "UPLOAD" button. The top navigation bar includes the CloudBlue logo, a "Products" dropdown, a "HELP" link, and a "Front Street Inc" section showing "Vendor • Robert Balboa". A success message box is overlaid on the right side of the page, stating "Locale \*es\_MX\* was updated" and "CLOSE".

Thus, your product ordering process via international marketplaces and the CloudBlue Commerce platform will support your specified localization. In case your localization requires an update, click the **Upload** button and upload your updated localization file.
