Introduction

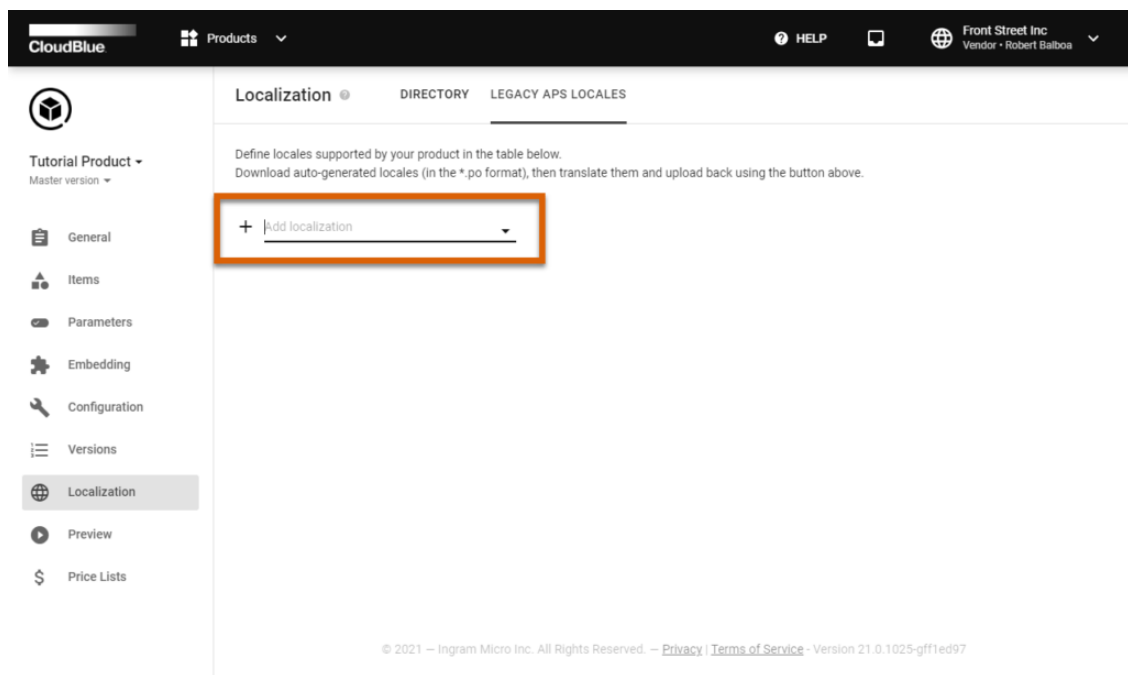

The **APS Locales** tab within the Localization section represents a legacy version of the localization functionality on CloudBlue Connect. Namely, it enables Vendors to provide a translation for the product ordering process. Specified localizations are used when presenting a product on international marketplaces.

The localization file that is generated via this tab includes text forms for automated messages and notifications related to product ordering operations. Note that the configured *localizable attributes* are applicable only to your provided localization.

The following guidelines showcase how to acquire a translation template via this tab and how to upload your provided localization file.

1. Add a supported localization

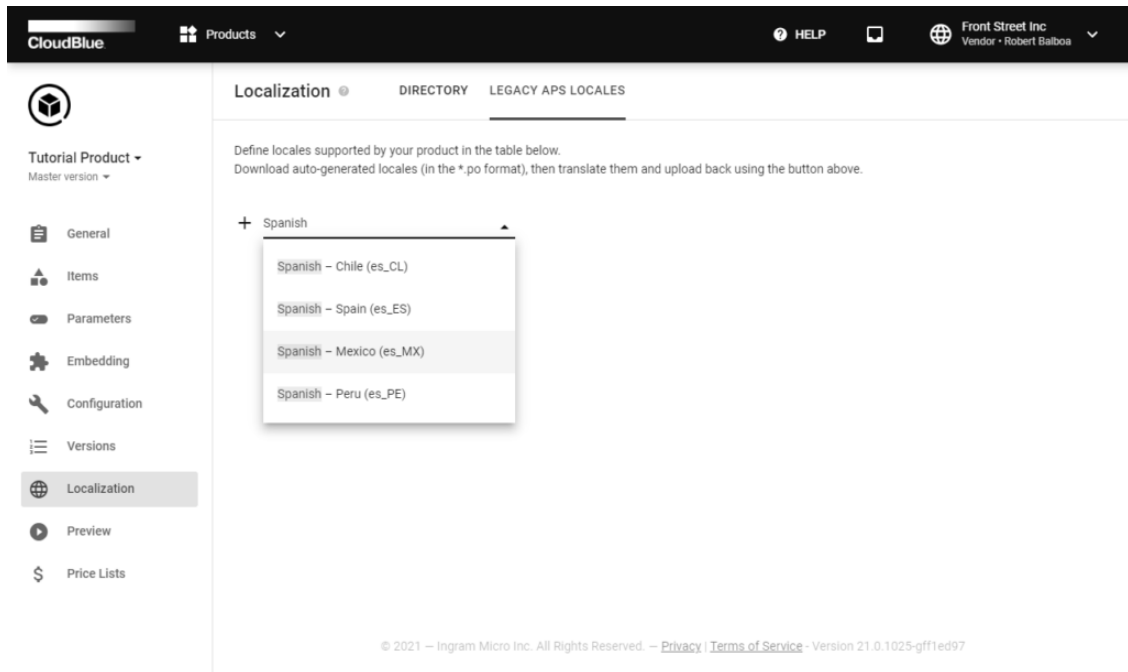

Click on the **Add Localization** field from the **Localization** section to select a language.

Advice

Enter your required language name, its code or region to narrow down the list.

Click on your selected language from the list.

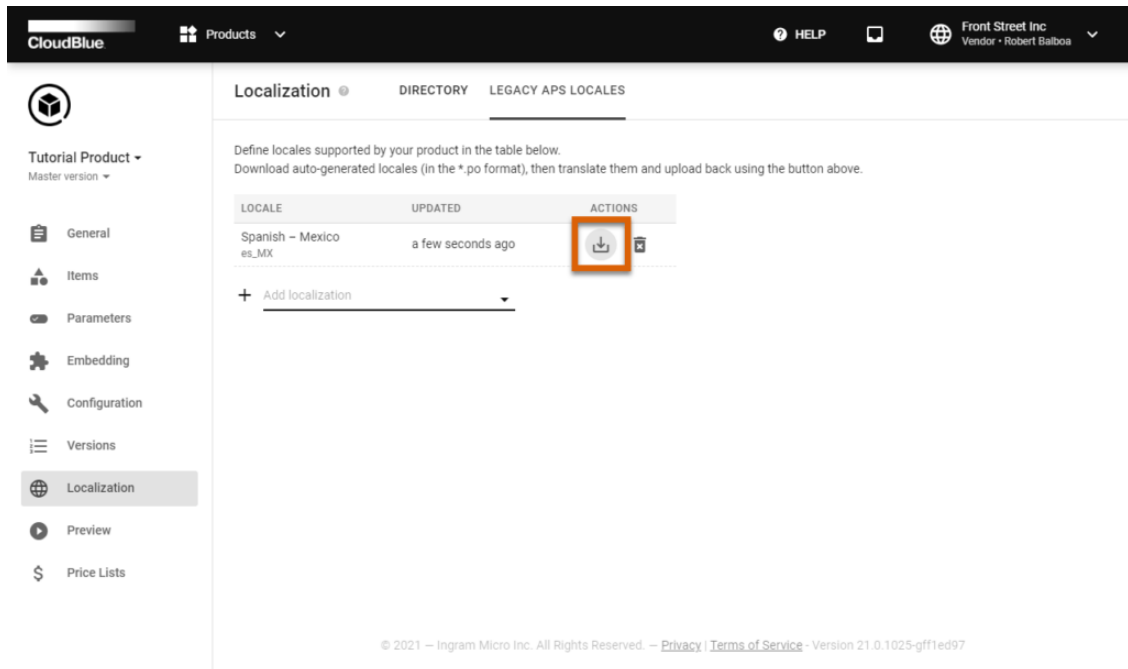

The screenshot shows the CloudBlue Localization interface. The left sidebar contains a navigation menu with options: General, Items, Parameters, Embedding, Configuration, Versions, Localization (selected), Preview, and Price Lists. The main content area is titled "Localization" and includes sub-tabs for "DIRECTORY" and "LEGACY APS LOCALES". Below the tabs, there is a text instruction: "Define locales supported by your product in the table below. Download auto-generated locales (in the *.po format), then translate them and upload back using the button above." A dropdown menu is open, showing a list of Spanish locales: Spanish - Chile (es_CL), Spanish - Spain (es_ES), Spanish - Mexico (es_MX), and Spanish - Peru (es_PE). The "Spanish - Mexico (es_MX)" option is highlighted. At the bottom of the page, there is a copyright notice: "© 2021 - Ingram Micro Inc. All Rights Reserved. - Privacy | Terms of Service - Version 21.0.1025-gff1ed97".

As a result, the system will display your created locale on a list.

2. Download a template file

Click on the **download** icon next to your specified locale to acquire a localization template file.

The screenshot shows the CloudBlue Localization interface with a table of locales. The table has three columns: "LOCALE", "UPDATED", and "ACTIONS". The first row contains the locale "Spanish - Mexico (es_MX)" with an update time of "a few seconds ago". The "ACTIONS" column for this row contains a download icon (a square with a downward arrow) and a delete icon (a square with an 'x'). The download icon is highlighted with a red square. Below the table, there is a "+ Add localization" button. At the bottom of the page, there is a copyright notice: "© 2021 - Ingram Micro Inc. All Rights Reserved. - Privacy | Terms of Service - Version 21.0.1025-gff1ed97".

LOCALE	UPDATED	ACTIONS
Spanish - Mexico (es_MX)	a few seconds ago	 

3. Provide required translations

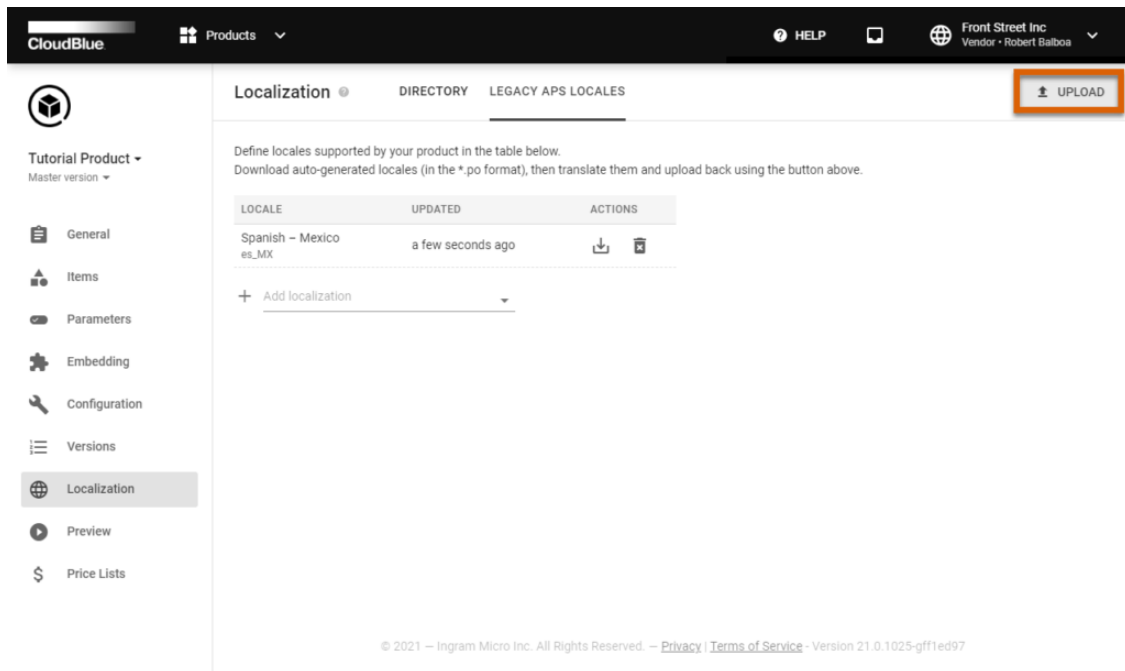

Information

Connect provides localization template files in the PO format. Use PO file editors (such as poedit.net) to open and edit these files.

Provide required translations via a PO file editor. Save your translated file in the PO format.

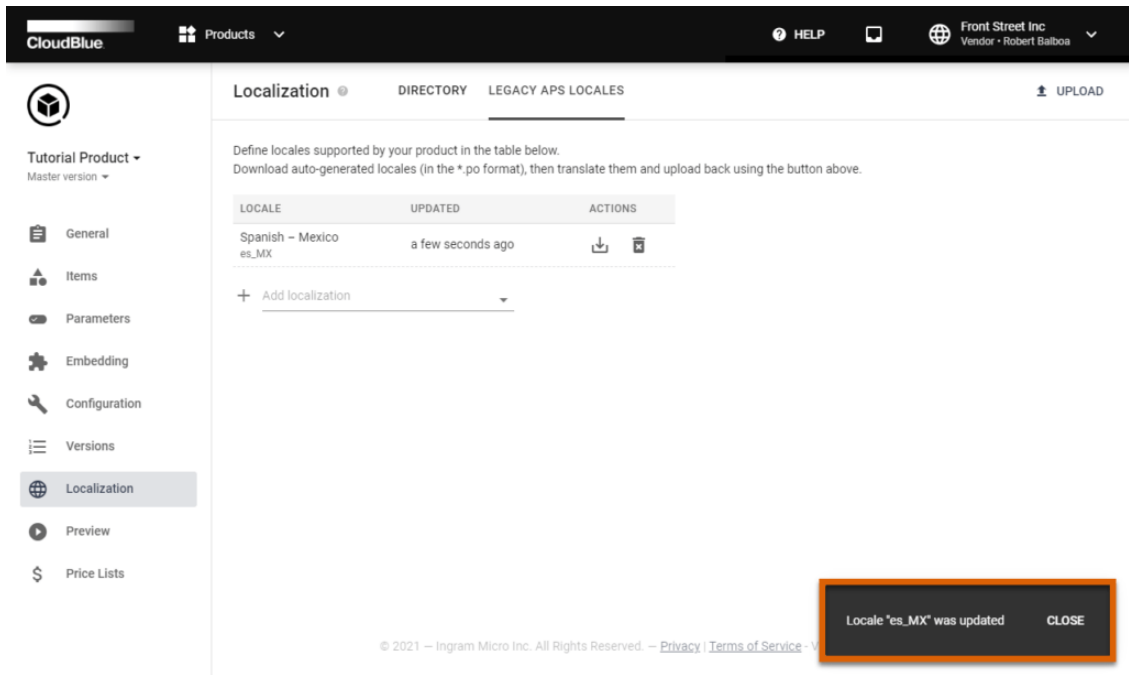

4. Upload your localization file

Click the **Upload** button to upload your file with provided translations.

The screenshot shows the CloudBlue Localization interface. The top navigation bar includes the CloudBlue logo, a 'Products' dropdown, a 'HELP' icon, a document icon, and the user information 'Front Street Inc' with 'Vendor: Robert Balboa' and a dropdown arrow. The main content area is titled 'Localization' and has tabs for 'DIRECTORY' and 'LEGACY APS LOCALES'. An 'UPLOAD' button is highlighted with an orange box in the top right corner. Below the tabs, there is a text instruction: 'Define locales supported by your product in the table below. Download auto-generated locales (in the *.po format), then translate them and upload back using the button above.' A table with three columns: 'LOCALE', 'UPDATED', and 'ACTIONS' is shown. The first row contains 'Spanish - Mexico es_MX', 'a few seconds ago', and download/delete icons. Below the table is a '+ Add localization' button with a dropdown arrow. The left sidebar shows a navigation menu with 'Localization' selected. The footer contains copyright information: '© 2021 - Ingram Micro Inc. All Rights Reserved. -- Privacy | Terms of Service - Version 21.0.1025-gf1ed97'.

Once a localization file is successfully uploaded, the system displays the following locale update message.

Thus, your product ordering process via international marketplaces and the CloudBlue Commerce platform will support your specified localization. In case your localization requires an update, click the **Upload** button and upload your updated localization file.
