Tier Config Interface

This article has been generated from the online version of the documentation and might be out of date. Please, make sure to always refer to the online version of the documentation for the up-to-date information.

Auto-generated at May 20, 2026

The following describes provided user interface and provides available operations within the Tier Config module on the CloudBlue Connect platform.

Tier Config Details

Click on your tier configuration ID from the **Directory** tab to access the **Tier Config Details** screen.

The screenshot shows the 'Tier Config Details' page in the CloudBlue interface. The top navigation bar includes the CloudBlue logo, 'Tier Config' dropdown, 'HELP', a notification icon, and 'Front Street Inc. Vendor - Robert Balboa'. The page title is 'Tier Config Details'. Below the title is a summary row with columns: Status (Processing), Config (TC-596-055-181), Request In Progress (TCR-596-055-181-001 Setup), Tier (Tier 1, TA-0000-2019-7285), Product (Tutorial Product, PRD-404-832-779), and Marketplace (Tutorial Marketplace, MP-38661). A navigation bar below the summary includes 'CONTROL PANEL', 'PARAMETERS', 'DETAILS', 'TIERS', 'REQUESTS', and 'SUBSCRIPTIONS'. The main content area contains a message: 'Please wait while your request is being fulfilled.'

© 2021 – Ingram Micro Inc. All Rights Reserved. – [Privacy](#) | [Terms of Service](#) - Version 22.0.1655-g0fd38d7

The screenshot shows the 'Tier Config Details' page for a different configuration. The top navigation bar is identical to the previous screenshot. The page title is 'Tier Config Details' with an 'UPDATE' icon on the right. The summary row shows: Status (Active), Config (TC-301-208-404), Request In Progress (–), Tier (Tier 2, TA-7173-4986-0219), Product (Tutorial Product, PRD-640-516-332), and Marketplace (Tutorial Marketplace, MP-38661). The navigation bar is the same. The main content area features a section titled 'Sample Template For Tutorial Tier Configuration'. The text below the title reads: 'This template is used to share details of the successful setup configuration of reseller of 2nd level. This template uses **Markdown** syntax and allows to use Parameters of the product which have scope 'Tier 2'. You can also embed pictures like the one below:'. Below the text is an image of the planet Saturn.

The **Tier Config Details** screen provides general tier configuration information, such as its **Status**, **Config** ID, associated **Request in Progress**, **Tier account** and its **level**, specified **Product** and **Marketplace**.

Furthermore, this screen contains various data within the following tabs:

- **Control Panel:** This tab displays a *Tier Approved* message once a tier request is fulfilled. Change this message via the Embedding section from your product profile page.
- **Parameters:** Access this tab to view specified *Ordering* or *Fulfillment* parameters.
- **Details:** This tab displays your associated Distributor/Vendor account and the connection ID. Furthermore, this tab provides business details, such as contract name, contract creation/update date and its ID.
- **Tiers:** Examine your reseller information via this tab.
- **Requests:** Access this tab to view associated tier requests and their details.
- **Subscriptions:** This tab displays associated subscriptions and their details.

Updating Tier Configuration

In case a tier configuration is successfully activated, **Tier Config Details** allows creating update tier requests to change this configuration. Follow the steps below to create a tier configuration update request.

Tier requests

Access your created update tier request via the **Requests** tab of the **Tiers Config** module. Refer to the Tiers Requests documentation and learn how to approve or reject tier requests.

Click the **Update** button from the **Tier Config Details** screen. Thus, the system will launch a tier config update wizard.

Follow the wizard steps to successfully update your tier configuration.

1. Overview

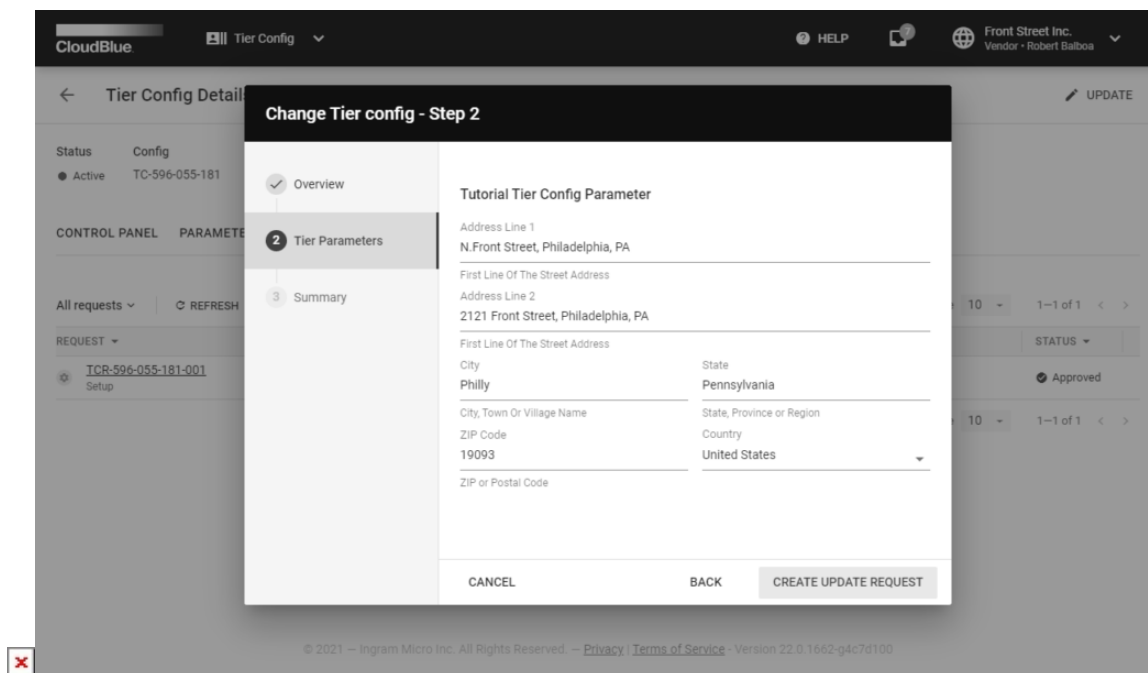

Get familiar with the following tier configuration overview.

Click the **Next** button to continue.

2. Tier Parameters

Fill out the following **Tier Parameters** form. Note that this form varies depending on your selected

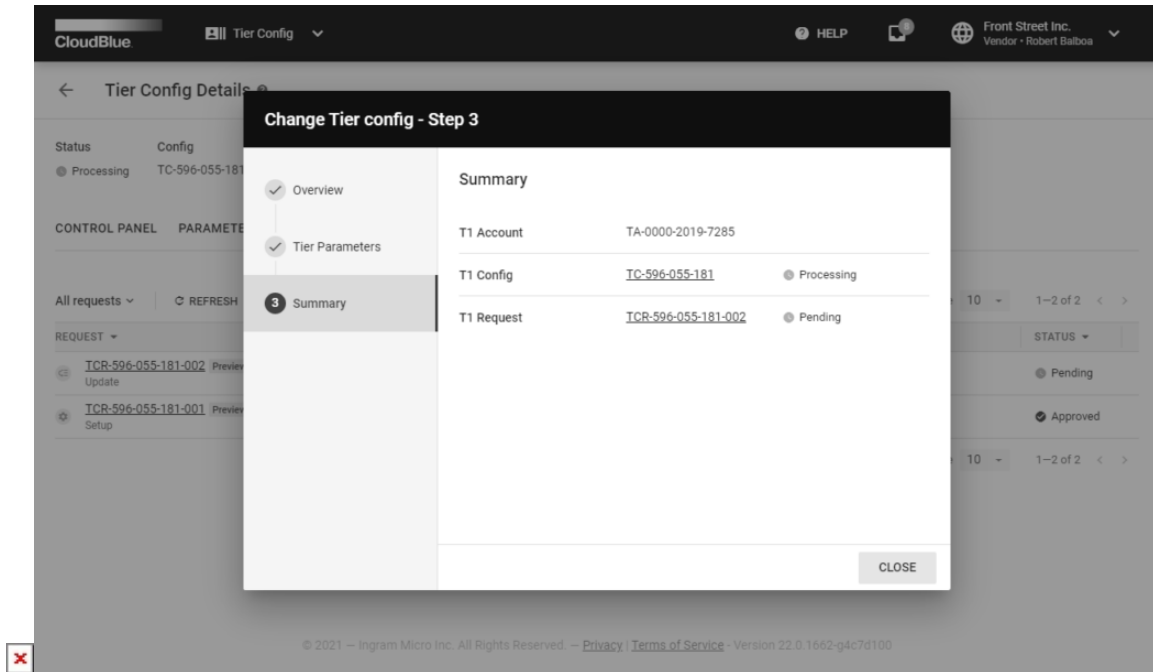

Click the **Create Update Request** button to create a corresponding tier request.

3. Summary

The system provides a summary that displays a tier account, tier configuration, tier requests.

Click **Close** after reviewing this summary.

Thus, your update tier request will be successfully created. This tier request can be approved or rejected by following guidelines below.

Tier Request Details

Click on your tier request ID from the **Requests** tab to access the **Tier Request Details** screen.

The **Tier Request Details** screen displays general tier request data, such as its **Status**, **Request ID**, associated **Tier Configuration**, specified **Product** and **Marketplace**. This screen also contains **Notes** that display system messages and provides a communication model for Partners.

Additionally, **Tier Request Details** provides various information within the following tabs:

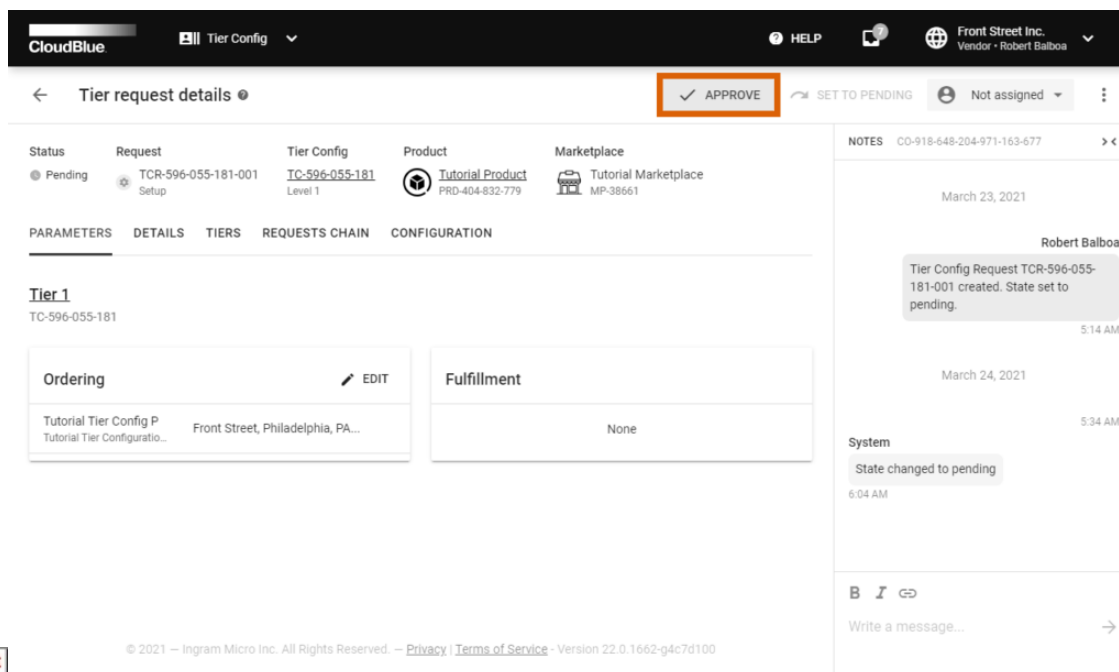

- **Parameters:** This tab contains specified *Ordering* or *Fulfillment* parameters. Vendors can specify parameters by using this tab. Note that Vendors can also inquire data of these parameters from Distributors.
- **Details:** This tab indicates the Distributor/Vendor accounts and the connection ID. Furthermore, this tab provides business details, such as contract name, contract creation/update date and its ID.
- **Tiers:** Examine your reseller information via this tab.
- **Request Chains:** Use this tab to examine request chains and their details.
- **Configuration:** Access specified configuration parameters and their details via this tab.

Note that the **Assignee** field allows selecting an assignee for the following operations. In case assignee is not selected and this field displays **Not Assigned**, the system assigns an operator automatically.

Approving Tier Requests

Vendors can approve *pending* tier requests by accessing **Tier Request Details**. Follow the steps below to successfully approve a tier request and activate a tier configuration.

1. Click the **Approve** button from the **Tier Request Details** screen.

The screenshot shows the 'Tier request details' screen in the CloudBlue interface. At the top right, the 'APPROVE' button is highlighted with a red box. The page displays various details for a pending tier request, including its ID (TC-596-055-181), status (Pending), and associated products and marketplaces. A right-hand sidebar contains a 'NOTES' section with a log of events, such as the request being created and its state being set to pending. The bottom of the screen shows a copyright notice for Ingram Micro Inc.

2. Select your Tier Approved activation template in the following form.

The screenshot shows the 'Approve request' dialog box overlaid on the Tier Request Details screen. The dialog has a title 'Approve request' and contains an 'Activation template' dropdown menu currently set to 'Default Activation Template - (TL-426-285-766)'. Below this is a 'Preview' section showing a sample template titled 'Sample Template For Tutorial Tier Configuration'. The preview text states: 'This template is used to share details of the successful setup configuration of reseller of 1st level.' Below the text is an image of the planet Saturn. At the bottom of the dialog are 'CANCEL' and 'APPROVE' buttons.

3. Click the **Approve** button to activate your tier request. Thus, the system will transfer this tier request to the **Approved** state.

Rejecting Tier Requests

In case of an unrecoverable error, Vendors or Distributors can reject a request from **Tier Request Details**. Follow the steps below to reject a tier request.

Information

Note that rejected tier requests cannot be restored. However, once a tier request is rejected, it is possible to update its associated tier configuration from the Tier Config Details screen.

1. Click on the vertical ellipsis () icon from top right corner of the **Tier Request Details** screen.

3. Leave a failed request note and click the **Apply** button.

Therefore, your tier request will be rejected and the system will transfer this request to the *Failed* state.

Inquiring parameter data

In case provided parameter data in a tier request is not valid, the system allows inquiring necessary information via **Tier Request Details**. Therefore, the system transfers your pending tier requests to the *Inquiring* state. Follow the steps below to inquire invalid parameter data.

Note

The Connect platform prompts to specify inquired parameter data via a specific form that can be obtained from a **system email**. Once a tier request is assigned to the *Inquiring* state, the system sends an email to provided tier contacts. Thus, this email contains a link that redirects to the required form.

1. Click the **Edit** button next to your parameter from the **Tier Request Details** screen.

Once your T2-level request is successfully approved, your tier request switches from the *Tiers Setup* state to the *Pending* status. Thereafter, the system enables Vendors to process required T1-level request.

Warning

In case T2-level request is rejected, it is impossible to approve T1-level request. Therefore, it is necessary to create a tier configuration and tier requests once again. Note that the system also allows Vendors and Distributors to reject request in the *Tier Setup* state.
